Austin,2008-06-30 James E Austin s case studies are designed to help managers effectively compete in the Third World business environment Designed for business school courses and in house company training programs this companion to *Managing in Developing Countries* presents 35 case studies organized around Professor Austin s Environmental Analysis Framework a powerful field tested tool designed to help managers examine prepare for and compete in the Third World business environment Through comprehensive and thoroughly tested classroom tested cases Austin systematically examines the economic political and cultural factors of each country at international national industry and company levels The cases also reveal the critical strategic issues and operating problems that managers will encounter in developing countries in governmental relations finance marketing production and organization Global Climate Governance Beyond 2012 Frank Biermann,Philipp Pattberg,Fariborz Zelli,2010-02-18 An assessment of policy options for future global climate governance written by a team of leading experts from the European Union and developing countries Global climate governance is at a crossroads The 1997 Kyoto Protocol was merely a first step and its core commitments expire in 2012 This book addresses three questions which will be central to any new climate agreement What is the most effective overall legal and institutional architecture for successful and equitable climate politics What role should non state actors play including multinational corporations non governmental organizations public private partnerships and market mechanisms in general How can we deal with the growing challenge of adapting our existing institutions to a substantially warmer world This important resource offers policy practitioners in depth qualitative and quantitative assessments of the costs and benefits of various policy options and also offers academics from wide ranging disciplines insight into innovative interdisciplinary approaches towards international climate negotiations **Technology Transfer and Economic Growth in Sub-Sahara African Countries** Nathaniel O. Agola,2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only

make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals

Strategic Planning in Technology Transfer to Less Developed Countries Christian Madu,1992-01-27 Despite an avalanche of literature over the last 30 years there has been relatively little written on the role played by strategic planning in the transfer of technology particularly from developed to less developed countries Technology transfer which involves the acquisition of inventive activity by secondary users is conceded vital to socio economic growth but usually it is looked at internationally from a micro perspective Unlike other books Madu s volume looks at technology transfer holistically It examines the advantages of technology transfer and its limitations by viewing recipient nations as systems in which social economic behavioral and political influences converge to help shape technological decisions Only when a systems perspective like this is adopted and technology seen as a strategic variable can technology transfer be understood and successfully implemented says Madu Madu thus identifies the failures of technology transfer as the result of malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government

Joint Venture Agreements in the Qatari Gas Industry Talal

Abdulla Al-Emadi,2019-03-29 This book addresses a question of importance for both theory and practice Why are joint venture agreements preferred over other types of agreements such as concession agreements service contracts and production sharing agreements in the Qatari gas industry On a theoretical level the author analyses this decision making process by developing an approach that integrates a micro level analysis more specifically within international oil companies with a macro level analysis that spring from the organisational culture of the Qatari gas industry At the micro level the author proposes John Dunning s eclectic paradigm as one set of theoretical ideas to explaining one element of the decision making process leading to the preference for joint venture agreements that is that of international oil companies At the macro level the author proposes Antony Giddens structuration theory as another set of theoretical ideas to explaining another part of this decision making process that is how it is being shaped by the organisational culture of the Qatari gas industry On an empirical level the proposed book applies a combination of a micro economic approach such as Dunning s eclectic paradigm with a macro sociological approach such as Giddens structuration theory by empirical investigation Grounded on a qualitative strategy that focuses on the meaning making which brings together different perspectives of this decision making process including those of international oil companies and the organisational culture of the Qatari gas industry the proposed book utilises a case study design named the case of the Qatari gas industry The author employs a triangulation of data collection techniques to access empirical data analysing official documents and semi structured interviews a sample of the interview questions are included in an appendix to the proposed books In line with the qualitative nature of this proposed book a thematic Analysis is adopted to interpret data based on Dunning s eclectic paradigm at the micro level and Giddens structuration theory at the macro level In doing so this book connects theory with practice by investigating the preference for joint venture agreements in the case of the Qatari industry by the combined application of one of the most effective frameworks for explaining foreign direct investment named Dunning s eclectic paradigm along with the most complex sociological framework that offers a rich definition of organisational culture named Giddens structuration theory Audience could include academics professionals and graduate and senior undergraduate students Contemporary Issues in Construction in Developing Countries George Ofori,2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to

New Perspectives on Construction in Developing Countries which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues The SAGE Encyclopedia of World Poverty Mehmet Odekon, 2015-06-15 The SAGE Encyclopedia of World Poverty Second Edition addresses the persistence of poverty across the globe while updating and expanding the landmark work Encyclopedia of World Poverty originally published in 2006 prior to the economic calamities of 2008 For instance while continued high rates of income inequality might be unsurprising in developing countries such as Mexico the Organization of Economic Co operation and Development OECD reported in May 2013 even countries with historically low levels of income inequality have experienced significant increases over the past decade including Denmark Sweden and Germany The U N and the World Bank also emphasize the persistent nature of the problem It is not all bad news In March 2013 the Guardian newspaper reported Some of the poorest people in the world are becoming significantly less poor according to a groundbreaking academic study which has taken a new approach to measuring deprivation The report by Oxford University s poverty and human development initiative predicts that countries among the most impoverished in the world could see acute poverty eradicated within 20 years if they continue at present rates On the other hand the U N says environmental threats from climate change could push billions more into extreme poverty in coming decades All of these points lead to the need for a revised updated and expanded edition of the Encyclopedia of World Poverty Key Features 775 evaluated and updated and 175 entirely new entries New Reader s Guide categories Signed articles with cross references Further Readings will be accompanied by pedagogical elements Updated Chronology Resource Guide Glossary and thorough new Index The SAGE Encyclopedia of World Poverty Second Edition is a dependable source for students and researchers who are researching world poverty making it a must have reference for all academic libraries
