E-Government Success around the World: Cases, Empirical Studies, and Practical Recommendations

Gil-Garcia, J. Ramon, 2013-06-30 While some e government projects fail to deliver the expected benefits due to numerous technical organizational institutional and contextual factors information technology continues to be utilized by international governments to achieve countless benefits E Government Success around the World Cases Empirical Studies and Practical Recommendations presents the latest findings in the area of e government success Written for academics and professionals this book aims to improve the understanding of e government success factors and cultural contexts in the field of governmental information technologies in various disciplines such as political science public administration information and communication sciences and sociology

Enacting Electronic Government Success J. Ramon Gil-Garcia, 2012-02-28 Many countries around the world are investing a great amount of resources in government IT initiatives However few of these projects achieve their stated goals and some of them are complete failures Therefore understanding e government success has become very important and urgent in recent years In order to develop relevant knowledge about this complex phenomenon researchers and practitioners need to identify and assess what are the main conditions variables or factors that have an impact on e government success However before being able to evaluate these impacts it is necessary to define what e government success is and what some e government success measures are This book presents a review of both e government success measures and e government success factors It also provides empirical evidence from quantitative analysis and two in depth case studies Although based on sound theory and rigorous empirical analysis the book not only significantly contributes to academic knowledge but also includes some practical recommendations for government officials and public managers Theoretically the book proposes a way to quantitatively operationalize Fountain's enactment framework Based on the institutional tradition the technology enactment framework attempts to explain the effects of organizational forms and institutional arrangements on the information technology used by government agencies According to Fountain 1995 2001 the technology enactment framework pays attention to the relationships among information technology organizations embeddedness and institutions This framework is very well known in the e government field but is normally used for qualitative analysis and there is no previous proposal of how to use it with quantitative data The book proposes variables to measure each of the different constructs in this framework and also tests the relationships hypothesized by Fountain's theory Finally using the advantages of the selected quantitative analysis technique Partial Least Squares the study also proposes some adjustments and extensions to the original framework in a theory building effort Methodologically the

book reports on one of the first multi method studies in the field of e government in general and e government success in particular This study uses a nested research design which combines statistical analysis with two in depth case studies The study begins with a statistical analysis using organizational institutional and contextual factors as the independent variables An overall score representing e government success in terms of the functionality of state websites is the dependent variable Second based on the statistical results two cases are selected based on their relative fitness to the model residuals and their position in the general ranking of website functionality which includes four different measures In order to complement the results of the statistical analysis case studies were developed for the two selected states New York and Indiana using semi structured interviews and document analysis In terms of the statistical analysis the book constitutes one of the first applications of Partial Least Squares PLS to an e government success study PLS is a structural equations modeling SEM technique and therefore allows estimating the measurement model and the structural model simultaneously The use of this sophisticated statistical strategy helped to test the relationships between e government success and different factors influencing it as well as some of the relationships between several of the factors thus allowing exploring some indirect effects too

E-Government Website Development: Future Trends and Strategic Models Downey, Ed,Ekstrom, Carl D.,Jones, Matthew A.,2010-07-31 This book provides fundamental clues about the direction forward in electronic government needed to achieve even greater value from websites and assist the continuing transformation of governmental interaction with citizens Provided by publisher

Organizing in a Digitized World Stefano Za, Augusta Consorti, Francesco Virili,2021-12-08 In a digitized world organizations and individuals have to deal with several challenges Both public and private organizations must revise their processes and create new ones to take advantage of new opportunities and respond to emerging threats At the same time people need to redesign their personal and professional lives to create situations or conditions conducive to achieving their goals in an ever expanding digital environment This book contains a collection of research contributions that address the issues that individuals organizations and society face when

operating in a digitized world The plurality of views offered makes this book particularly relevant to academics businesses and public sector organizations It gathers a selection of the best papers double blind peer reviewed presented at the Annual Conference of the Italian Section of AIS in October 2020 in Pescara Italy **Exploring the Limits** European Communication Council (ECC),2012-12-06 The ECC was formed in 1996 to discuss current developments in information and communication technologies and related perspectives for economics politics and social systems The 1997 report gives a scientific evaluation of some of the discussed trends in our society **Reinventing the Workplace** John Worthington,2012-08-21 At the beginning of the 1990s over 60 per cent of the working population was in white collar employment and approximately two thirds of this number were direct users of information technology to enhance their working practices The salaried clerk working in a routine repetitive nine to five job has been succeeded by the flexible independent innovative knowledge worker The place of work its location use character quality and management are changing but can and will the property management and design professions reappraise themselves to meet the challenge Reinventing the Workplace stems from a seminar held at the Institute of Advanced Architectural Studies The University of York on trends in workplace organization design and utilization The book articulates the organizational and technological developments that are influencing the procurement layout and management of the workplace through case studies and reflections on practice by leading corporations and consultants in the field It provides an invaluable background of the key issues for workplace users their professional advisers external consultants and suppliers **Managing E-Government Projects: Concepts, Issues, and Best Practices** Aikins, Stephen Kwamena,2012-01-31 This book collects the work of some of the best scholars and practitioners in the fields of e government and project management who explore how e government projects can be managed planned and executed with effective project management techniques and methodologies Provided by publisher *Digital Democracy: Concepts, Methodologies, Tools, and Applications* Management Association, Information Resources,2012-06-30 This book presents a vital compendium of research detailing the latest case studies architectures frameworks methodologies and research on Digital Democracy Provided by publisher **ICT, Public Administration and Democracy in the Coming Decade** A.J. Meijer,F. Bannister,M. Thaens,2013-06-20 The physicist Neils Bohr allegedly wrote that Prediction is very difficult especially about the future Many academics believe that serious scholars should never attempt to write about the future but some awareness of the ways in which the future of e government may evolve is needed if well grounded long term decisions about issues such as infrastructures institutions and educational programs are to be made In addition future oriented research is of the utmost importance for informed public debate about technological developments with far reaching societal implications This book marks the 25th anniversary of the permanent study group on e government of the European Group for Public Administration and the papers here were first presented at their 2012 meeting in Bucharest Romania The invited authors were not asked for rigorous analyses based on systematic empirical

research or deeply rooted in a theoretical framework instead they were challenged to write thoughtful and measured but provocative essays about ICT and public administration in the coming decade Their contributions are reflections on the nature of new and emerging technologies in the public sector and their impact on government and on democracy itself The book is divided into three sections the past and present as starting point for thinking about the future of e government imagining the future of government and implications for research and practice The many questions raised by developments in ICT for future public administration are presented in a clear and thought provoking manner and merit more debate This volume represents a departure from the normal run of academic publications It is intended both to provoke academics and administrators to think about questions which will affect all of our futures and to offer a range of creative ideas about how the opportunities presented by technology can be exploited to provide better government and governance
