**Theology and Technology, Volume 1** Carl Mitcham,Jim Grote,Levi Checketts,2022-07-21 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology* the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H Richard Niebuhr's five ideal types in *Christ and Culture* The second volume includes biblical historical and modern theological engagements with the place of technology in the Christian life This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul Taken together these essays some reproductions of earlier work and others original for this project provide any student of theology a fitting entrance into considering the place of technology in the realm of the sacred      *Visions of Technological Transcendence* James A. Herrick,2017-03-03 This book examines key narratives animating the techno progressive rhetoric of the human enhancement movement arguing that enhancement and transhumanist discourse performs a variety of distinctly mythic functions Principal among these is to cast a vision of a technological future involving enhanced posthumans immortality human merger with machines and space colonization      *The Practice of Technology* Alan Drengson,1995-10-12 Asks why current practices of technology negatively impact humans and the earth and how we can gain a holistic understanding so technology practices can be changed to support the environment      *Telos* ,1994      **Manifesto for a Global Civilization** Matthew Fox,Brian Swimme,1982      **The Technocene** Hermínio Martins,2018-12-15 Herm nio Martins was one of the key pioneers of the sociology of science and technology He published extensively in Portuguese and was recognized for his academic contributions with an honorary doctorate at Lisbon 2006 and two Portuguese Medals of Honour Following his retirement from the University of Oxford he wrote prolifically in English on a wide range of topics that examined the ethical and societal consequences of the commoditization of the human body and mind These essays are deep philosophical reflections on our contemporary world and draw extensively and eclectically upon a wide range of theoretical influences including continental philosophy history and psychology to name but a few disciplines The Technocene is a selection of some of these insightful essays made available to a global audience for the first time      **Soleri** Antonietta Iolanda Lima,2003 As much a philosopher as he is an architect Paolo Soleri worked with Frank Lloyd Wright in the late 1940s and went on to develop his own extensive architectural and philosophical concepts Since the 60 s he has been involved almost exclusively with the design of alternative urban planning models By 1970 he had outlined thirty Arcologies the combination of architecture and ecology to generate

complex compact highly active pedestrian cities This comprehensive monograph the first on Soleri to be published in the United States follows his entire career through a presentation of drawings sketches and built work Newly translated from the Italian and extensively illustrated it provides the most complete view of Soleri s work available Since settling in Scottsdale Arizona in 1956 Soleri has made a life long commitment to research and experimentation in urban planning establishing the Cosanti Foundation a nonprofit educational foundation Cosanti s major project is Arcosanti a prototype town intended for 5 000 60 miles north of Phoenix designed by Soleri which has continually grown since construction began in 1970 Arcosanti embodies Soleri s urban ideals to maximize the interaction and accessibility associated with an urban environment to minimize the use of energy raw materials and land thus reducing waste and environmental pollution and to allow interaction with the surrounding natural environment Antonietta Iolanda Lima s authoritative study of Soleri s long career demonstrates the fascinating evolution of this uniquely far reaching and innovative architect *Future Survey Annual 1986* Michael Marien,1987-01-01

**From the Golem to Freedom** Gábor L. Ambrus,2024-02-08 With a particular focus on social media G bor L Ambrus explores how human beings relate to contemporary information technology Ambrus argues that religious traditions such as Judaism and Christianity as well as secular philosophical thought inspired by religion can be invoked to describe both the freedom and unfreedom of the user of information technology To illustrate how individuals relate to technology in a restricted and totalitarian online environment Ambrus adopts the figure and legend of the golem from Jewish mysticism At the same time his argument features other religious concepts and themes to describe an alternative to our present predicament of unfreedom while not seeking to portray any redemption outside the technological environment At the core of his argument Ambrus presents the experience of nothingness as a source of freedom opening up the possibility for a free relationship for us all with information technology Critical Posthumanism and Planetary Futures Debashish Banerji,Makarand R. Paranjape,2016-10-07 This volume is a critical exploration of multiple posthuman possibilities in the 21st century and beyond Due to the global engagement with advanced technology we are witness to a species wise blurring of boundaries at the edge of the human On the one hand we find ourselves in a digital age in which human identity is being transformed through networked technological intervention a large part of our consciousness transferred to smart external devices On the other hand we are assisted or assailed by an unprecedented proliferation of quasi human substitutes and surrogates forming a spectrum of humanoids with fuzzy borders Under these conditions critical posthumanism asks who will occupy and control our planet Will the superhuman merely serve as another sign under which new regimes of dominance are spread across the earth Or can we discover or invent technologies of existence to counter such dominance It is issues such as these which are at the heart of this new volume of explorations of the posthuman The essays in this volume offer leading edge thought on the subject with special emphases on postmodern and postcolonial futures They engage with questions of subalternity and feminism vis vis posthumanism dealing with issues of subjugation dispensability and surrogacy as well as

the possibilities of resistance ethical politics or subjective transformation from South Asian archives of cultural and spiritual practice This volume is a valuable addition to the on going global dialogues on posthumanism indispensable to those from across several disciplines who are interested in postcolonial and planetary futures *Cosmotechnics* Yuk Hui, Pieter Lemmens, 2021-05-18 This volume is initial reflections on the meaning and the implications of Yuk Hui's notion of cosmotechnics which opens up an anti universalist and pluralist perspective on technology beyond the West Martin Heidegger's famous analysis of the essence of technology as enframing and as rooted in ancient Greek techne has had a crucial influence on the understanding and critique of technological society and culture in the twentieth century However it is still unclear to what extent his analysis can also be applied to the development of technology outside of the West e.g. in China Africa and Latin America particularly against the backdrop of receding Western domination and impending global ecological disaster Acknowledging the planetary expansion of Western technology already observed by Heidegger yet also recognizing the existence of non Western origins of technical relationships to the cosmos Yuk Hui's notion of cosmotechnics calls for a rethinking in dialogue with decolonial studies and the so called ontological turn in contemporary anthropology of the question concerning technology which challenges the universality still present in Heidegger as well as in Simondon and Stiegler and proposes a radical technological or rather cosmotechnical pluralism or technodiversity The contributors to this volume critically engage with this proposal and examine the possible implications of Hui's cosmotechnical turn in thinking about technology as it becomes a planetary force in our current age of the Anthropocene The chapters in this book were originally published as a special issue of *Angelaki* *Eschatology and the Technological Future* Michael S. Burdett, 2014-12-05 The rapid advancement of technology has led to an explosion of speculative theories about what the future of humankind may look like These technological futurisms have arisen from significant advances in the fields of nanotechnology biotechnology and information technology and are drawing growing scrutiny from the philosophical and theological communities This text seeks to contextualize the growing literature on the cultural philosophical and religious implications of technological growth by considering technological futurisms such as transhumanism in the context of the long historical tradition of technological dreaming Michael Burdett traces the latent religious sources of our contemporary technological imagination by looking at visionary approaches to technology and the future in seminal technological utopias and science fiction and draws on past theological responses to the technological future with Pierre Teilhard de Chardin and Jacques Ellul Burdett's argument arrives at a contemporary Christian response to transhumanism based around the themes of possibility and promise by turning to the works of Richard Kearney Eberhard Jüngel and Jürgen Moltmann Throughout the author highlights points of correspondence and divergence between technological futurisms and the Judeo Christian understanding of the future **The Writer's Directory, 1998-2000** Miranda H. Ferrara, 1995 Information on more than 17 500 living authors from English speaking countries *Journal of Scientific & Industrial Research*, 1983 **Chrysalis**, 1987
