## **Technology And Human Becoming:**

Technology and Human Becoming Philip Hefner, From a leader in the field of religion and science come these reflections on the role of technology in human life and culture Philip Hefner sees the human spirit at issue in our assessment of and attitude toward technology and the many technological creations that humans spawn Technology he argues tells us much about ourselves especially our innate drive toward exploration of possibilities and poses questions about the final meaning of creating of human cultural evolution and even the being of God *Human Becoming in an Age of Science, Technology, and Faith* Philip Hefner,2022-08-23 What does it mean to be human in an age of science technology and faith The ability to ask such a question suggests at least a partial answer in that however we describe ourselves we bear a major role in determining what we will become In this book Philip Hefner reminds us that this inescapable condition is the challenge and opportunity of Homo sapiens as the created co creator In four original chapters and an epilogue Hefner frames the created co creator as a memoirist with an ambiguous legacy explores some of the roots of this ambiguity emphasizes the importance of answering this ambiguity with symbols that can interpret it in wholesome ways proposes a partial theological framework for co creating such symbols and applies this framework to the challenge of using technology like artificial intelligence and robotics to create other co creators in our own image Editors Jason P Roberts and Mladen Turk have compiled eight responses to Hefner s work to honor his scholarly career and answer his call to help co create a more wholesome future in an age of science technology and faith **God, Humanity and the Cosmos - 2nd Edition** Christopher Southgate,2005-12-01 Contributors include Christopher Southgate John Hedley Brooke Celia Deane Drummond Paul D Murray Michael Robert Negus Lawrence Osborn Michael Poole Jacqui Stewart Fraser Watts David Wilkinson This fully revised and updated edition of *God Humanity and the Cosmos* includes new chapters by John Hedley Brooke Paul D Murray and David Wilkinson In addition to a systematic exploration of contemporary perspectives in physics evolutionary biology and psychology as they relate to theological descriptions of the universe humanity and consciousness the book now provides a thorough survey of the theological philosophical and historical issues underpinning the science religion debate Contributors also examine such issues as theological responses to the ecological crisis and to biotechnology how science is treated and valued in education and the relation of science to Islamic thought Dr Christopher Southgate is Lecturer in Theology at the University of Exeter

Thinking about God in an Age of Technology George Pattison,2005-09-22 Technology shapes every aspect of contemporary life but George Pattison argues that thinking about God offers a creative counter movement to the dominant technological culture His argument is applied to questions of ethics university study the arts and urban living *Human Technological Enhancement and Theological Anthropology* Victoria Lorrimar,2022-05-05 In this book Victoria Lorrimar explores anthropologies of co creation as a theological response to the questions posed by technologically enhanced humans a prospect that is disturbing to some but compelling for many The centrality the imagination for moral reasoning attested in

recent scholarship on the imagination offers a fruitful starting point for a theological engagement with these envisioned technological futures Lorrimar approaches the topic under the purview of a doctrine of creation that affirms a relationship between human and divine creativity Traditionally theological treatments of creativity have been almost exclusively applied to artistic endeavours Here Lorrimar breaks new ground by extending such theological accounts to include technology and uniting them with the strengths of scientific accounts of co creation She draws on metaphor studies cognitive sciences as well as literary studies to develop an account of human creativity in relation to divine creativity which is then applied to various enhancement scenarios

*Human Becoming in an Age of Science, Technology, and Faith* Philip Hefner, 2022-08-23

What does it mean to be human in an age of science technology and faith The ability to ask such a question suggests at least a partial answer in that however we describe ourselves we bear a major role in determining what we will become In this book Philip Hefner reminds us that this inescapable condition is the challenge and opportunity of Homo sapiens as the created co creator In four original chapters and an epilogue Hefner frames the created co creator as a memoirist with an ambiguous legacy explores some of the roots of this ambiguity emphasizes the importance of answering this ambiguity with symbols that can interpret it in wholesome ways proposes a partial theological framework for co creating such symbols and applies this framework to the challenge of using technology like artificial intelligence and robotics to create other co creators in our own image Editors Jason P Roberts and Mladen Turk have compiled eight responses to Hefner s work to honor his scholarly career and answer his call to help co create a more wholesome future in an age of science technology and faith

**Cyborg Theology** Scott A. Midson, 2017-10-30 In particular Donna Haraway argued in her famous 1991 Cyborg Manifesto that people since they are so often now detached and separated from nature have themselves evolved into cyborgs This striking idea has had considerable influence within critical theory cultural studies and even science fiction where it has surfaced for example in the Terminator films and in the Borg of the Star Trek franchise But it is a notion that has had much less currency in theology In his innovative new book Scott Midson boldly argues that the deeper nuances of Haraway s and the cyborg idea can similarly rejuvenate theology mythology and anthropology Challenging the damaging anthropocentrism directed towards nature and the non human in our society the author reveals through an imaginative reading of the myth of Eden how it is now possible for humanity to be at one with the natural world even as it vigorously pursues novel post human technologies

**The Scientific Imaginary in Visual Culture** Anneke Smelik, 2010 Popular media art and science are intricately interlinked in contemporary visual culture This book analyses the scientific imaginary that is the result of the profound effects of science upon the imagination and conversely of the imagination in and upon science As scientific developments in genetics occur and information technology and cybernetics open up new possibilities of intervention in human lives cultural theorists have explored the notion of the posthuman The Scientific Imaginary in Visual Culture analyses figurations of the posthuman in history and philosophy as well as in its utopian and dystopian forms in art and popular culture The authors

thus address the blurring boundaries between art and science in diverse media like science fiction film futurist art video art and the new phenomenon of bio art In their evaluations of the scientific imaginary in visual culture the authors engage critically with current scientific and technological concerns      *Issues in Science and Theology: Global Sustainability* Michael Fuller, Mark Harris, Joanna Leidenhag, Anne Runehov, 2023-10-26 This volume brings together contributions from the 2022 conference of the European Society for the Study of Science and Theology held in lesund Norway to address the many urgent questions raised by the concept of global sustainability Scholars from the fields of philosophy theology and the sciences offer a variety of perspectives on global sustainability and on how the need for it can best be effected and sustained The material assembled here covering the roots of the present ecological crisis as well as means for addressing it from ecological societal and both Christian and Islamic theological perspectives inform discussions of these questions both within the academy and in wider public fora This text appeals to students and researchers in the field      Beyond Cutting Edge? Paul C.

Heidebrecht, 2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder s thought by emphasizing that the church also plays a crucial role in our moral formation      *Technology, Media Literacy, and the Human Subject* Richard S. Lewis, 2021-06-03

Media literacy is often focused on evaluating the message rather than reflecting on the medium Bringing together postphenomenology media ecology posthumanism and complexity theory Richard Lewis s book offers a method for such a reflection and shows how our everyday media environments constitute us as post human subjects one that is becoming and constitutes through relations also with our media technologies An original interdisciplinary effort including for example the term intrasubjective mediation and a must read book for everyone interested in how we become with and through technologies Prof Mark Coeckelbergh University of Vienna *Technology Media Literacy and the Human Subject* is a clearly and concisely written book that employs a fruitful transdisciplinary approach It at once offers an excellent grounding in the literature whilst simultaneously developing a useful tool for students to reflect deeply and critically upon their own engagement with media Thoroughly recommended Alexander Thomas University of East London What does it mean to be

media literate in today's world. How are we transformed by the many media infrastructures around us? We are immersed in a world mediated by information and communication technologies (ICTs). From hardware like smartphones, smartwatches, and home assistants to software like Facebook, Instagram, Twitter, and Snapchat, our lives have become a complex interconnected network of relations. Scholarship on media literacy has tended to focus on developing the skills to access, analyze, evaluate, and create media messages without considering or weighing the impact of the technological medium, how it enables and constrains both messages and media users. Additionally, there is often little attention paid to the broader context of interrelations which affect our engagement with media technologies. This book addresses these issues by providing a transdisciplinary method that allows for both practical and theoretical analyses of media investigations. Informed by postphenomenology, media ecology, philosophical posthumanism, and complexity theory, the author proposes both a framework and a pragmatic instrument for understanding the multiplicity of relations that all contribute to how we affect and are affected by our relations with media technology. The author argues persuasively that the increased awareness provided by this posthuman approach affords us a greater chance for reclaiming some of our agency and provides a sound foundation upon which we can then judge our media relations. This book will be an indispensable tool for educators in media literacy and media studies as well as academics in philosophy of technology, media and communication studies, and the posthumanities.

**Technology and the Overturning of Human Autonomy** Simona Chiodo, 2023-04-26. This book offers an extensive historical, philosophical, and ethical discussion on the role of autonomous technologies and their influence on human identity. By connecting those different perspectives and analysing some practical case studies, it guides readers to dissect the relationship between machine and human autonomy and machine and human identity. It analyses how the relationship between human and technology has been evolving in the last few centuries. Last, it aims at proposing an explanation on the reasons why humans have been keen on developing their own autonomy's perfect avatar.

**Religious and Cultural Implications of Technology-Mediated Relationships in a Post-Pandemic World** Ilia Delio, Noreen Herzfeld, Robert Nicastro, 2023-06-07. Technology is an integral part of our world. But how does inter-human technology affect our ability to be present to one another, to God, to ourselves, and to the world around us? Modern technologies are reshaping human relationships. While they offer new possibilities for presence across time and space, they also function as either a substitute for human relationships or as a filter that mediates relationships between ourselves and others. In our technologically saturated world, it is vital that we become aware of how these technologies alter our perceptions, our actions, and our relationships. *Religious and Cultural Implications of Technology-Mediated Relationships in a Post-Pandemic World* offers a variety of positions on how technology is influencing religious, communal, and cultural life. There is no doubt that our interaction with technology will shape the human community up ahead. These essays provide a basis for thoughtful choice and action.

**Religious Transhumanism and Its Critics** Arvin M. Gouw, Brian Patrick Green, Ted Peters, 2022-03-10. Why

do representatives of different religious traditions find the transhumanist vision of the future not only theologically compatible but even inspiring Transhumanism is a global movement seeking radical human enhancement The trans in transhumanism marks the transition from the present stage in human evolution into the future namely post human existence Containing chapters written by adherents to a variety of religious traditions Religious Transhumanism and Its Critics provides first hand testimony to the value of the transhumanist vision perceived by the religious mind In addition the contributors critique both secular and religious transhumanism in light of realistic science and commitment to social justice

**Christ and Evolution** Celia Deane-Drummond, 2009 The figure of Christ is at the heart of Christian faith and self understanding whether conservative or liberal In this volume widely acclaimed theologian Celia Deane Drummond sets out to develop an understanding of Christ that is far more conscious of the evolutionary history of humanity and current evolutionary theories about the natural world It argues that the concepts of wisdom and wonder have special roles in both theology and science and can point to an integrated inclusive spirituality and a fuller vision of life and the universe Book jacket

A Nomadic Pedagogy about Technology John R. Dakers, 2022-11-21 Although technology education is in desperate need of reform the new refuses to be born Despite the introduction of technological literacy the evolving merger with science mathematics and engineering STEM and even a proposed merger between STEM and the arts STEAM nothing has changed The subject continues to be a craft based vocationally orientated subject Human beings have always had a relationship with technology but never before has the progression of technological development had such an impact on the environment one which has led to the birth of the Anthropocene This poses the greatest existential threat ever known to the future of human existence Those in power continue to turn a blind eye to this threat Moreover technology education today does not reflect issues relating to our technologically textured lifeworld Given that it is the young who will inherit this potentially dystopic future they must be given a voice one in which they can reimagine their futures in a sustainable way This book explores the development of ethnotechnological literacy as delivered by a radical new nomadic pedagogy inspired by the philosophy of Deleuze and Guattari one that can enable these voices to be expressed and more importantly to be heard

**Christ In Evolution** Ilia Delio, 2010

How Matter Matters Paul R. Carlile, 2013-03-28 The third volume in the Perspectives on Process Organization Studies Series focuses on the entanglement of social and material aspects of organizations and in particular the role of objects and material artifacts in the process of organizing
