Technology, Defense, And External Relations In China, 1975-1978 Harry G. Gelber, 2019-07-11 This volume surveys efforts by China's post Mao leadership to adopt modern technology in China's industrial and economic sectors while focusing new attention on an increasingly obsolescent defense structure. The author presents these efforts against the background of the external political and military environment to which the PRC must react. He outlines the foreign policy and strategic problems that faced the new administration as it came to power in Peking and examines the military industrial and technical resources currently at China's disposal as well as changes that have been proposed, implemented, or that may be required in the future. Finally, he suggests some of the limitations circumscribing government policy in these areas and some of the choices that lie ahead.

China Among the Nations of the Pacific Harrison Brown, 2019-08-27 On May 14, 1960, the East West Center was officially created by the Congress of the United States. As a part of the celebration of the twentieth anniversary of this event, a symposium was held on May 19, 1980, at the National Academy of Sciences in Washington, D.C. The subject, China and the Nations of the Pacific, was selected because the theme for the anniversary year of the East West Center had been established as Building a Pacific Community. It has been suggested that international mechanisms for coming to grips with such interdependencies in the Pacific region as trade, investment, food, energy, and mineral commodities are inadequate. In response to such suggestions, hearings have been held in both houses of the Congress of the United States on the idea of a Pacific community. This symposium was organized as part of that general discussion. The contributors hope that the papers presented here will further stimulate thought and debate on the problems of the Pacific region.

The Chinese Military System Harvey W. Nelsen, 2019-07-11 To understand the Chinese military and thereby the dynamics of China's peacetime army, one must understand its organizational system. To that end, Harvey Nelsen has written a book that examines in detail the entire organization of the Chinese People's Liberation Army (PLA). Dr. Nelsen studies the PLA from top to bottom. Throughout, he challenges the widely held theory that military politics in China are largely determined by personal relations among officers and that the PLA is more a civic action army than are most military organizations.

Important as a purely military study this book is valuable also for the light it sheds on the whole of Chinese bureaucratic politics This second edition has been revised to reflect changes that have occurred since the death of Chairman Mao as well as to incorporate new information about the Chinese military and political system during Mao's reign

Opium, Soldiers and Evangelicals H. Gelber, 2004-02-24 This book questions the universal belief that England's 1840-42 war with China was an Opium War What really worried London was insults to the crown the claim of a dilapidated and corrupt China to be superior to everyone threats to British men and women and seizure of British property plus the wish to expand and free trade everywhere It was only much later that general Chinese resentment and Evangelical opinion at home and in America persuaded everyone that Britain had indeed been wicked and fought for opium

Economic Reform In The PRC C. W. Borklund, 2019-03-04 In February 1978 the post Mao leadership revealed an ambitious ten year program 1976-1985 with a 600 million capital outlay aimed at propelling China into the front ranks of the industrialized nations by the year 2000 through the modernization of agriculture industry science and technology and defense The new leadership soon realized that

The Dragon and the Foreign Devils Harry Gelber, 2011-04-05 China is the most exciting rising power in the world today The fact that China may be the next superpower attracts endless interest from all quarters yet China is still utterly inscrutable to most outsiders In *The Dragon and the Foreign Devils* Harry Gelber illuminates China's present by looking at the broad sweep of foreign relations in its past From the incursions by the steppe horsemen and the Mongol conquests to the first arrival of European travelers foreign fascination with China has followed certain patterns curiosity admiration and greed for trade or territory But as China gradually rises from the turbulence in the wake of Mao Zedong to the economic growth and political stability of the twenty first century the dynamic between East and West has slowly shifted Essential reading for anyone interested in China and its evolving relations with foreigners *The Dragon and the Foreign Devils* breaks down the walls between East and West and shines a light on the recurring cycles of Chinese history

Nations Out of Empires H. Gelber, 2001-06-04 In this book Harry Gelber examines centuries of colonial interaction and argues for a close link between revolution in 18th century Europe and the development of Asian nationalism from the 19th Century onwards The author reviews how adoption of European industrial and financial practices encouraged an adoption of European ideologies in general Asia became attracted by liberal principles particularly that of national self determination and decolonization The effect was to change the future balance of international power
