## **Technology Education Reform:**

Technology and Education Reform Barbara Means, 1994-04-08 This book shows how the introduction of new instructional technologies can support and further the efforts of school reform. It provides concrete illustrations from successful programs around the country and looks at the technologies which hold the most promise for increasing student learning. Approx

*Using Technology to Support Education Reform* Barbara Means, 1993 Many critics of American education see technology as an important tool in bringing about the kind of revolutionary changes called for in new reform efforts. Consequently support for the use of technology to promote fundamental reform appears to be reaching a new high. Following an introduction describing elements of school reform, Chapter 2 describes how technology can support the kinds of student learning described in a model of reform presented in Chapter 1. Chapter 3 describes the ways that technology can support student learning as defined by education reformers, and Chapter 4 describes ways in which technology can support teacher efforts to promote student learning. Chapter 5 reviews the literature on the effects of technology on student learning outcomes. The final chapter deals with issues of implementation for projects attempting education reform supported by technology. Three tables and two figures summarize information about technology and reform. Contains 192 references. SLD

**Technology and Education Reform** Barbara Means, Kerry Olson, 1998 Addresses the question of whether technology can provide significant support for constructivist, project-based teaching and learning approaches and the associated issue of the elements needed for an effective implementation of technology within an educational reform context. Includes case studies of 9 sites that have been using technology in ways that enhance a restructuring of the classroom around students' needs and project-based activities. Sites selected were those that emphasized education reform and provided challenging, authentic activities for students from economically disadvantaged backgrounds. Illustrated. *Using Technology to Support Education Reform*, 1993 Questioning Technology Karen Ann Ferneding, 2003 This book revisits current technocentric educational reform policy and examines the meaning of educational reform within the context of a technological society and globalized market economy. Having colonized the politics of educational reform, technocentrism has narrowed the social space of educational reform discourse by invalidating alternative social visions germane to the tradition of social justice and the development of a civic society. This book interrogates current technocentric discourse through the voices of educators who engage in the practice of questioning technology and raises significant issues regarding the dominance of a technology-based reform agenda, techno-utopianism as a dominant social vision, and the positioning of teachers within school cultures reconfigured by control technologies and performativity. Educators need to create a deliberative approach to technology adoption for only by assuming a more questioning stance toward the adoption of technological innovations can we hope to avoid technological determinism and take responsibility for the consequences of our inventions. **Secondary STEM**
