**A History of Technology** Charles Singer, E. J. Holmyard, A. R. Hall, Trevor I. Williams, 1957 *Technology, Pessimism, and Postmodernism* Yaron Ezrahi, E. Mendelsohn, Howard P. Segal, Howard Segal, 1994 This is the first systematic examination of the contemporary and prior connections between technological progress and pessimism over the future If the hallmark of the Enlightenment was a firm belief in technology as a principal instrument of universal progress the hallmark of postmodernism may well be skepticism even despair over technology's role in shaping our world This book incorporates the perspectives of historians political scientists philosophers and literary scholars to illuminate the origins evolution and influence of technological pessimism and to evaluate its long term prospects The volume should appeal to specialists in technology studies and the history of ideas but also to general readers concerned with these dilemmas of technological progress

**Technology in the 20th Century** Alex Chase, 2007-04 The perfect book for trivia fans and for anyone interested in the history of technology

*History of Technology Volume 30* Ian Inkster, Angel Calvo, 2016-03-31 This book focuses on the development of four key issues in the development of modern Spain knowledge manufacturing energy and telecommunications and public works If technology transfer from advanced nations to less developed systems always worked then the whole world would now be rich That this is not the case is so obvious we might

well expect that the history of the processes successes and failures of technology transfer across nations would be a very well established field of enquiry In fact the theme is still a developing one and the present Special Issue centres on the case of Spain as exemplary in many respects The collected essays focus upon the four major themes of knowledge manufacturing energy and telecommunications and public works Essays range in time from the 18th century to the present time from studies of espionage and early links between craftsmen and savants to the institutions of technology from training systems to private enterprise activity or patents to case studies of silk manufacture shipbuilding mining paper making and pharmaceuticals Each essay offers a broad variety of material to bring to bear on a major problem of world development past present and future

Major authors investigated include Chaucer Blake Romaine Pynchon and Prigogine

**Technology** Eric Schatzberg, 2018-11-12

In modern life technology is everywhere Yet as a concept technology is a mess In popular discourse technology is little more than the latest digital innovations Scholars do little better offering up competing definitions that include everything from steelmaking to singing In *Technology Critical History of a Concept* Eric Schatzberg explains why technology is so difficult to define by examining its three thousand year history one shaped by persistent tensions between scholars and technical practitioners Since the time of the ancient Greeks scholars have tended to hold technicians in low esteem defining technical practices as mere means toward ends defined by others Technicians in contrast have repeatedly pushed back against this characterization insisting on the dignity creativity and cultural worth of their work The tension between scholars and technicians continued from Aristotle through Francis Bacon and into the nineteenth century It was only in the twentieth century that modern meanings of technology arose technology as the industrial arts technology as applied science and technology as technique Schatzberg traces these three meanings to the present day when discourse about technology has become pervasive but confusion among the three principal meanings of technology remains common He shows that only through a humanistic concept of technology can we understand the complex human choices embedded in our modern world

**Feminist Cultural Studies of Science and Technology** Maureen McNeil, 2008-01-15

Feminist Cultural Studies of Science and Technology challenges the assumption that science is simply what scientists do say or write it shows the multiple and dispersed makings of science and technology in everyday life and popular culture This first major guide and review of the new field of feminist cultural studies of science and technology provides readers with an accessible introduction to its theories and methods Documenting and analyzing the recent explosion of research which has appeared under the rubric of cultural studies of science and technology it examines the distinctive features of the cultural turn in science studies and traces the contribution feminist scholarship has made to this development Interrogating the theoretical and methodological features it evaluates the significance of this distinctive body of research in the context of concern about public attitudes to

science and contentious debates about public understanding of and engagement with science     Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06 BERNWARD JOERGES AND HELGA NOWOTNY  
YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters
