Agricultural Extension: The Case of Pakistan Ahmed Munir, Andrew Davidson, 2017-11-01 This title was first published in 2003 he public sector plays a dominant international role in the provision of agricultural extension and services This role has been the subject of much debate Some argue for extension s privatization claiming that a market driven system provides the most rational and efficient means of information delivery Based on extensive empirical research from the Punjab Pakistan this volume examines the comparative effectiveness of public and private extension services from the perspective of farmers It also focuses on information from extension agents about their respective organizations and work environments In so doing the book expands and elaborates on the practical considerations of privatization and information delivery It then broadens out into a discussion of alternative means of extension delivery focusing on participatory approaches education theory and pluralism *Non-Governmental Organizations and the State in Africa* James G. Copestake, Kate Wellard, 2024-11-01 This

presents twenty specially commissioned case studies of farmer participatory approaches to agricultural innovation initiated by NGOs in Africa Beginning with a broad review of institutional activity at the grassroots the authors set the case material within the context of NGO relations with the State and their contribution to democratisation and the consolidation of rural civil society Specific questions are raised how good bad are NGOs at promoting technological innovation and addressing constraints to change in present agriculture how effective are NGOs at strengthening grassroots organizations and how do will donor pressures influence NGOs and their links to the State This title is part of a series on Non Governmental Organizations co ordinated by the Overseas Development Institute To complete this comprehensive review and critique there are two other regional case study volumes on Asia and Latin America and an overview volume Reluctant Partners The State of World Rural Poverty Idriss Jazairy, Mohiuddin Alamgir, Theresa Panuccio, 1992 Despite almost four decades and billions of dollars in development activities we are barely in a position to track the changing dynamics of poverty or to define

with conviction the processes that entrap the poor in their misery Accounting for about 90% of global poverty rural poverty through transmigration is also a main contributor to urban poverty It is in the rural areas of the world where poverty is most severe in human terms where the hunger hopelessness hardship and despair commonly associated with entrenched poverty are most pronounced where basic health services sanitation educational opportunities and other common amenities are most lacking The alleviation of rural poverty is therefore tantamount to the alleviation of global poverty in its entirety The State of World Rural Poverty offers the first comprehensive look at the economic conditions and prospects of the world s rural poor
