Ha sido elaborada por los Servicios del Ministerio de Industria Turismo y Comercio Dirección General de Política Tecnológica e incorpora comentarios y observaciones aportados por las Comunidades Autónomas y los expertos y entidades más representativos del sector. Es el complemento imprescindible del Reglamento Electrotécnico para Baja Tensión *Técnicas para el mantenimiento diagnóstico de máquinas eléctricas rotativas* Manés Fernández Cabanas, 1998-11-02 Este libro es el resultado de la colaboración entre cuatro profesores del Departamento de Ingeniería Eléctrica Electrónica de Computadores y Sistemas de la Universidad de Oviedo y la empresa ABB Service. Sus autores M. F. Cabanas, M. G. Melero, G. A. Orcajo, J. M. Cano, Universidad de Oviedo y J. Solares, ABB Service, ponen de manifiesto uno de los problemas más importantes que se presenta en cualquier planta industrial: las averías de los motores eléctricos. Estas averías representan un apartado de coste importante, pero los costes fundamentales no son los relacionados específicamente con su reparación, sino los asociados con la falta de disponibilidad de la máquina averiada. Esto tiene especial relevancia en aquella maquinaria que es crítica para el sistema de producción de la planta y cuya parada puede suponer la paralización de toda una línea del proceso productivo. Atendiendo a la importancia de este tema en el ámbito industrial, surge este libro en el que se recopilan las técnicas que se pueden considerar como tradicionales en el mantenimiento predictivo de máquinas eléctricas. A lo largo de sus páginas, el lector podrá descubrir o recordar a través de la experiencia profesional e investigadora de los autores, los principios en los que se asientan las distintas técnicas de diagnóstico, así como los criterios comúnmente utilizados para establecer la condición en la que se encuentra la máquina. Asimismo, se resumen en esta obra, en forma de nuevos métodos para la detección de fallos con la máquina en funcionamiento, parte de la actividad investigadora de los autores, para la cual el apoyo de ABB Service ha sido primordial. *Manual de Prácticas Electrónica Industrial I Ingeniería Técnica Industrial: Electricidad 2º Curso, 1er Cuatrimestre* Emilio Olías Ruiz, Andrés Barrado Bautista, Antonio Lázaro Blanco, Jorge Pleite Guerra, Rosa Ana Salas Merino, José De Jesús Quintero Paredes, 2010-06-02 1.
