The Most Evil of Them All Sam Human,2023-06-01 Most serial murderers undeniably spring from abusive or neglected childhoods and or are potentially predisposed to various genetic sociopathic or schizophrenic afflictions rendering the root cause of their murderous behaviour a complex lethal combination of factors What is less credited however is the role of pathological narcissism and narcissistic personality disorder NPD in the making of a serial killer Narcissistic rage sexual narcissism necrophilia and cannibalism are all driven by a need to control and satisfy a grandiose sense of entitlement for personal pleasure and of those narcissistic rage is possibly the most dangerous factor of all in the understanding of serial rape and murder In this riveting book the author explores the role of NPD through the lived experiences of various serial murderers and showcases the profiles of both infamous and lesser known serial offenders from South Africa and around the world From the blatant callous criminality of the likes of Jason Rohde Dr Wouter Basson and Henri van Breda to the unspeakable cruelty of serial rapists and murderers like Ted Bundy Jeffrey Dahmer Kobus Geldenhuys the Norwood killer and Don Steenkamp the Griekwastad murderer this book reveals the role pathological narcissism might have played in some of the most notorious and gruesome criminal cases of our times Just one warning Don t read this book at night

Sentimental Rules Shaun Nichols,2004-11-04 Sentimental Rules is an ambitious and highly interdisciplinary work which proposes and defends a new theory about the nature and evolution of moral judgment In it philosopher Shaun Nichols develops the theory that emotions play a critical role in both the psychological and the cultural underpinnings of basic moral judgment Nichols argues that our norms prohibiting the harming of others are fundamentally associated with our emotional responses to those harms and that such sentimental rules enjoy an advantage in cultural evolution which partly explains the success of certain moral norms This has sweeping and exciting implications for philosophical ethics Nichols builds on an explosion of recent intriguing experimental work in psychology on our capacity for moral judgment and shows how this

empirical work has broad import for enduring philosophical problems The result is an account that illuminates fundamental questions about the character of moral emotions and the role of sentiment and reason in how we make our moral judgments This work should appeal widely across philosophy and the other disciplines that comprise cognitive science **Blood**

Obsession Jörg Woltje, 2005 What is it about vampires that fascinates the human imagination Blood Obsession closely scrutinizes theories of Sigmund Freud and Tzvetan Todorov and arrives at a model of the vampire as the perfect representative of genre for a variety of reasons the vampire figure appeals to its audience because of an interdependency of looplike mental and narrative structures that lure both reader and writer incessantly back to the genre At the same time this book provides the reader with a thorough survey of literary and filmic vampires in both adult and juvenile fictions Lastly it blends the realms of legal and literary history by highlighting the changes the image of the serial killer a close relative of the vampire underwent at the end of the twentieth century Blood Obsession is a highly enlightening study for the general reader as well as for students of film literature and popular culture **Highwayman** MJ Preston, 2019-07-02 First in the serial
