

HOW IS SOCIETY Affected By *Teenage Pregnancy*

Pregnant teenagers and their children often require more medical care and attention, increasing healthcare costs.

The expenditure on public services, including food stamps, public services, and programs, increases as pregnant teenagers may make use of these.

Teen pregnancies add to the number of college dropouts among girls, as only 50% of teen mothers graduate from high school compared to 90% of nonpregnant adolescent women.

Teenage pregnancy may add to unemployment as young adults may remain unemployed or underemployed due to a lack of proper education.

Pregnancy can put the teen's parents and extended family under emotional and financial stress.

Adolescent Health: Background and the effectiveness of selected prevention and treatment services, 1991 This three volume work presents the Office of Technology's assessment of the physical emotional and behavioral health status of contemporary American adolescents including those living in poverty racial and ethnic minority groups Native Americans and rural adolescents Specific topics covered are identifying risk and protective factors for adolescent health problems evaluating options in the organization of health services and technologies available to adolescents assessing options in the conduct of national health surveys to improve collection of adolescent health statistics and identifying gaps in research on the health and behavior of adolescents **Adolescent Health**, 1991 *Cumulated Index Medicus*, 1987 *Handbook of Adolescent*

Health Risk Behavior Ralph J. DiClemente, William B. Hansen, Lynn E. Ponton, 2013-11-21 Adolescence is a developmental period of accelerating physical psychological social cultural and cognitive development often characterized by confronting and surmounting a myriad of challenges and establishing a sense of self identity and autonomy It is also unfortunately a period fraught with many threats to the health and well being of adolescents and with substantial consequent impairment and disability Many of the adverse health consequences experienced by adolescents are to a large extent the result of their risk behaviors Many adolescents today and perhaps an increasing number in the future are at risk for death disease and other adverse health outcomes that are not primarily biomedical in origin In general there has been a marked change in the causes of morbidity and mortality among adolescents Previously infectious diseases accounted for a disproportionate share of adolescent morbidity and mortality At present however the overwhelming toll of adolescent morbidity and mortality is the result of lifestyle practices **Children in Poverty** Aletha C. Huston, 1991 The number of children living in poverty in the

United States increased dramatically during the 1980s and remains high Why are so many children growing up in poor families What are the effects of poverty on children's physical cognitive social and emotional development What role can public policy and policy research play in preventing or alleviating the damaging effects of poverty on children **Children in Poverty** examines these questions focusing on the child rather than on parents income or self sufficiency *SAMT*, 1990
