Telecommunications : World Bank experience and strategy Bjorn Wellenius, Banco Mundial, 1993

Telecommunications and Empire Jill Hills, 2023-12-11 Jill Hills picks up from her pathbreaking study *The Struggle for Control of Global Communication The Formative Century* to continue her examination of the political technological and economic forces at work in the global telecommunications market from World War II to the World Trade Organization agreement of 1997 In the late twentieth century focus shifted from the creation and development of global communication markets to their intense regulation The historical framework behind this control where the market was regulated by what institution controlled by what power and to whose benefit masterfully complements Hills's analysis of power relations within the global communications arena Hills documents attempts by governments to direct replace and bypass international telecommunications institutions As she shows the results have offered indirect control over foreign domestic markets government management of private corporations and government protection of its own domestic communication market Hills reveals that the motivation behind these powerful regulatory efforts on person to person communication lies in the unmatched importance of communication in the world economy As ownership of communications infrastructure becomes more valuable governments have scrambled to shape international guidelines Hills provides insight into struggles between U S policymakers and the rest of the world illustrating the conflict between a growing telecommunications empire and sovereign states that are free to implement policy changes Freshly detailing the interplay between U S federal regulation and economic power Hills fosters a deep understanding of contemporary systems of power in global communications

The Politics of the Internet in Third World Development Bert Hoffmann, 2004-10-01 This book examines the political and developmental implications of the new information and communication technologies NICT in the Third World Whereas the concept of the digital divide tends to focus on

technological and quantitative indicators this work stresses the crucial role played by the political regime type the pursued development model and the specific configuration of actors and decision making dynamics Two starkly contrasting Third World countries state socialist Cuba and the Latin America s show case democracy Costa Rica were chosen for two in depth empirical country studies Global Markets and Government Regulation in Telecommunications Kirsten Rodine-Hardy,2013-03-25 In recent years liberalization privatization and deregulation have become commonplace in sectors once dominated by government owned monopolies In telecommunications for example during the 1990s more than 129 countries established independent regulatory agencies and more than 100 countries privatized the state owned telecom operator Why did so many countries liberalize in such a short period of time For example why did both Denmark and Burundi nations different along so many relevant dimensions liberalize their telecom sectors around the same time Kirsten L Rodine Hardy argues that international organizations not national governments or market forces are the primary drivers of policy convergence in the important arena of telecommunications regulation they create and shape preferences for reform and provide forums for expert discussions and the emergence of policy standards Yet she also shows that international convergence leaves room for substantial variation among countries using both econometric analysis and controlled case comparisons of eight European countries *An Empirical Analysis of competition, Privatization, and Regulation in telecommunications Market in Africa and Latin America* Scott J. Wallsten,1999 **Telecommunications in Asia** John Ure,1995-01-01 This book provides searching analysis and a detailed and comprehensive account of telecommunications in the developing economies of Southeast and East Asia Historical Dictionary of the World Bank Sarah Tenney,Anne C. Salda,2013-10-30 When it was founded back in 1944 no one could possibly have foreseen how the World Bank known more formally as the International Bank for Reconstruction and Development IBRD would flourish Today with 188 members it is by far the largest lender for projects in agriculture health infrastructure and many other fields in developing countries around the world with a budget of billions of dollars and a staff of more than 9 000 and its advice is usually heeded by both the developing countries which borrow from it and the advanced ones which contribute This second edition of the Historical Dictionary of the World Bank shows the substantial progress the Bank has made this mainly through the dictionary section with concise entries on its component institutions related organizations its achievements in various fields some of the major projects and member countries and its various presidents The introduction explains how the Bank works while the chronology traces the major events over nearly 70 years Meanwhile the list of acronyms reminds us just who the main players are And the bibliography directs readers to useful internal documentation and outside studies *The Design and Administration of Intergovernmental Transfers* Donald R. Farmers in Sub-Saharan Africa Katrine Anderson Saito, Hailu Mekonnen, Daphne Spurling, 1994 World Bank Discussion Paper 230 Based on four country studies and extensive household surveys this paper documents the breakdown of traditional farming systems in Sub Saharan Africa and its implications for the role of women in agriculture A Guide to the World Bank, 2003 The World Bank Group works in more than 100 developing economies and is one of the world s largest sources of development assistance In 2002 the institution provided US 19 5 billion in loans to its client countries This guide reviews the organisation s history objectives and operations and looks at the five institutions that make up the World Bank Group the International Bank for Reconstruction and Development IBRD the International Development Association IDA the International Finance Corporation IFC the Multilateral Investment Guarantee Agency MIGA and the International Centre for Settlement of Investment Disputes ICSID **World Bank** Anne C. M. Salda, 1995 **World Development Report 1994**, 1994 World Development Report 1994 examines the link between infrastructure and development and explores ways in which developing countries can improve both the provision and the quality of infrastructure services In recent decades developing countries have made substantial investments in infrastructure achieving dramatic gains for households and producers by expanding their access to services such as safe water sanitation electric power telecommunications and transport Even more infrastructure investment and expansion are needed in order to extend the reach of services especially to people living in rural areas and to the poor But as this report shows the quantity of investment cannot be the exclusive focus of policy Improving the quality of infrastructure service also is vital Both quantity and quality improvements are essential to modernize and diversify production help countries compete internationally and accommodate rapid urbanization The report identifies the basic cause of poor past performance as inadequate institutional incentives for improving the provision of infrastructure To promote more efficient and responsive service delivery incentives need to be changed through commercial management competition and user involvement Several trends are helping to improve the performance of infrastructure First innovation in technology and in the regulatory management of markets makes more diversity possible in the supply of services Second an evaluation of the role of government is leading to a shift from direct government provision of services to increasing private sector provision and recent experience in many countries with public private partnerships is highlighting new ways to increase efficiency and expand services Third increased concern about social and environmental sustainability has heightened public interest in infrastructure design and performance Developing Effective Employment Services David Fretwell, Susan Goldberg, 1993-01-01 Employment services promote the efficient allocation of labor by among other things promoting labor mobility and improving productivity This paper assesses the cost effectiveness of services designed to expedite the exchange of labor between job seekers and employers The authors find that the benefits of employment services are not uniform Benefits may be reduced in small countries with a large informal sector or when the economy is stagnant and the demand for labor is depressed even though the need for the services may be greater under such

conditions The authors advocate a balance between public and private sector delivery of employment services They favor opening the private market for what they term support services which increase productivity and include income support and retraining Such support services are distinct from what the authors call core services provision of which they believe is properly left to the public sector Core services to assist job seekers include job placement services relocation assistance counseling and skills assessment The authors find that core services are cost effective and that public sector providers can ensure that such services are delivered to unemployed low skilled or semiskilled workers whose needs may not be met by the private sector The paper reviews the justification for and development of employment services over time and compares various approaches to the provision of such services It reviews the various types of employment services and examines the differences between public and private sector delivery
