E-Conomics Axel Zerdick, Klaus Schrape, Alexander Artope, Klaus Goldhammer, Ulrich T. Lange, Eckart Vierkant, Esteban Lopez-Escobar, Roger Silverstone, 2013-04-17 The Internet transformed the landscape of world economy E conomics provides readers a roadmap to this new landscape a systematic reference guide to economics in the information age and serves as the first textbook available Scientists in communication economics from the U S and Europe have collaborated to provide an in depth analysis of the Internet revolution showing how the rules of the game have changed in an economy trading information instead of industrial goods E conomics focuses on the European telecommunications industry and features strategies for a successful Network Economy as well as an emphasis on network infrastructure and the importance of compatible technological standards Some perspectives given in 1998 when the original version appeared became reality since This book is essential reading for economists and business strategists requiring an understanding of the dynamics of electronic commerce The underlying data was kept up to date Global Telecommunications Raymond Akwule, 2023-12-22 Global Telecommunications 1992 clarifies the complex politically charged arena of international telecommunications By understanding both the demands created by dynamic Western countries in the grips of deregulation and the needs of developing nations readers acquire an appreciation for the challenges facing global telecommunications users developers and policymakers This book stresses the growing need for sophisticated management of satellite and communication resources The emerging global information society is propelled by technological innovations and these developments are shaping the way the world s population receives information *The V-chip Debate* Monroe E. Price, 2013-11-26 The V chip is a highly significant part of the discussion about whether television or broadcasting in general deserves some special attention in terms of its accessibility to children its particular power to affect conduct and its invasiveness But as this notion of filtering and labeling has caught the imagination of the regulator the legislator and all those who wish to consider new ways to alter bargaining over imagery in society the very idea of the V chip or its equivalent is moving across other technologies including the Internet The V chip issue has also fueled the ongoing debate about violence and sexual practices in society and how representations on television relate to those practices Although the initial concept of the V chip is simple its flow into the public realm raises so many extraordinary questions that the introduction and production

of the chip virtually serves as a case study in problems of law and public policy The very conceptualization of speech in society is being affected by this issue Accordingly the place of the V chip in this debate is increasingly important indeed it may be argued that the V chip s contribution to legal argumentation may be greater than its ultimate contribution to the relationship between children and imagery Among the questions the contributors address are What research basis is necessary to require a framework for labeling and rating What relationship between government and the image producing industries can be characterized for constitutional and other reasons as voluntary as opposed to coercive Who should evaluate these images To what extent should the evaluation process be centralized and or distributed What assessment is appropriate to evaluate whether the experiment is successful In addition to the V chip s origin s in Canada and its further evolution in the United States this book discusses the development of the V chip and television rating systems in Europe Australia and throughout the world It also includes essays which contrast the very different approaches in Canada and the United States in terms of the role of regulatory agency industry and government

Media Education Assessment Handbook William G. Christ,2020-07-24

Assessing media education is a formidable task because both assessment and media education are complex and controversial concepts Assessment which can take place at the individual student class sequence program department or unit and university levels is questioned in terms of reliability validity relevance and cost Media education which has been challenged at a number of schools finds faculty and administrators in the midst of soul searching about how to clearly articulate its missions and purposes to a broader audience Departments are under increasing national state and institutional pressure to get assessment procedures carried out quickly but there is an obvious danger in rushing to implement assessment strategies before establishing what is essential in media education In communication education in general the what of assessment is often discussed in terms of skills attitudes affect values and knowledge People assess students to determine what they know think feel value and can do Here it is suggested that one of the places to start defining what students should learn from their media education is by identifying outcomes Outcomes can be assessed in a variety of ways but first they need to be developed and clearly articulated
