McKercher,2009-08-04 This book addresses the changing nature of work workers and their organizations in the media information and knowledge industries It begins with a concise analysis of the meaning of knowledge work and of an information society **Employment, Employability and Equal Opportunities in the Postal and Telecommunications Services** ,2002 Reviews some of the changes that have occurred in postal and telecommunications services since the mid 1990s and where they are likely to lead in the next few years The New Structure of Labor Relations Harry C. Katz,Wonduck Lee,Joohee Lee,2018-07-05 Tripartism the national level interaction among representatives of labor management and government occurs infrequently in the United States Based on the U S experience then such interactions might seem irrelevant to economic performance and policymaking The essays in this volume reveal the falsity of that assumption Contributors from eight industrialized countries Australia Germany Ireland Italy Japan Korea the Netherlands and the United States examine the changing nature of labor management relations with a particular focus on the role of tripartism and the decentralization of collective bargaining Although nonexistent in the United States and on the decline in Japan and Australia tripartism flourishes in Germany Ireland and the Netherlands expanding beyond traditional corporatist partners to include women s organizations senior citizens and other representatives of civic society The vibrancy of the coordinating mechanisms that help shape employment conditions and labor policy contradicts the traditional belief that an overpowering unilateral decentralizing shift is underway in labor management interactions The contributors show that these mechanisms are in fact increasing in the face of intensified pressures promoting greater flexibility in work organization and working time **International and Comparative Employment Relations** Greg J. Communities and Workforce Development Edwin Meléndez,2004 Farberville Arkansas is playing host to its first ever mystery convention Sponsored by the Thurber Farber Foundation and held at Farber College Murder Comes to Campus is playing host to five major mystery writers representing all areas of the field Dragooned into running the show when the original organizer is hospitalized local bookseller Claire Malloy finds herself in the midst of a barely controlled disaster Not only do each of the writers present their own set of idiosyncrasies and difficulties including one who arrives with her cat Wimple in tow the feared distrusted and disliked mystery editor of Paradigm House Roxanne Small puts in a surprise appearance at the conference Added to Claire s own love life woes with local police detective Peter Rosen things have never been worse Then when one of the attendees dies in a suspicious car accident Wimple the cat disappears from Claire s home and Roxanne Small is nowhere to be found it becomes evident that the murder mystery is more than a literary genre The Management of Human Resources in the Asia Pacific Region Chris Rowley,John Benson,2004 Explosive economic and social changes in the Asia Pacific region have meant that much of what we know about the area is outdated This book addresses this and looks at the human resource period with detailed analysis discussion and predictions for the future Focusing on the areas of China Hong Kong Japan Korea the Philippines Singapore Taiwan and Thailand the book explores the reasons behind changes and whether they indicate movement of convergence or divergence the key issues for management and the implications for theory development This is the latest research available on this subject A must for managers researchers and those teaching undergraduate or postgraduate courses as well as those interested in international business sociology and employee relations Regulatory Reform and Labor Markets James Peoples,2012-12-06 Regulatory reform represents a major shift in the government s role toward price determination in the transportation and telecommunication industries The resulting policy emphasizes dependence on market forces to set prices and to encourage efficient production techniques While extensive research investigates the influence of deregulation on prices profits and productivity the effect on labor markets has not received the same scrutiny Firms in these industries are of major importance to business operations in other industries because they provide the critical services of transporting goods and transmitting information This may partly explain such extensive research on the product market aspects of regulatory reform Examining labor markets in the transportation and telecommunications industries is also highly warranted as historically these industries represented some of the most heavily unionized sectors in the economy The extent to which regulatory reform has encouraged product market competition may not necessarily result in the same degree of competition across industries Regulatory Reform and Labor Markets debates the notion that research on regulatory reform and labor markets should develop within the framework of

the competitive model This is achieved by presenting diverging views on wage and employment determination in distinctly different deregulated industries *National Capitalisms, Global Competition, and Economic Performance* Sigrid Quack, Glenn Morgan, Richard Whitley, 2000 Why are some firms successful on global markets whilst others are not In this collection of papers a group of distinguished international researchers examine the inter relationship between national context firm performance and global competitiveness In a series of empirical studies covering major industries such as banking telecommunications construction automobiles and airlines in a number of European countries Great Britain France Germany Holland Finland Slovenia the studies show how distinctive patterns of firm competences and capabilities arise from national contexts These influence the way in which firms perform in response to changing technologies and competitive pressures Thus the impact of the globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This book will be of interest to researchers in business and management sociology economics and political science for its comparative organizational approach to problems of economic performance **People and Culture in Construction** Andrew Dainty, Stuart Green, Barbara Bagilhole, 2007-05-07 Construction is one of the largest and most people intensive industrial sectors In many countries however construction is also one of the most highly criticized in terms of its employment practices and industrial relations People and culture are too often seen as variables that must be manipulated in the cause of improved productivity This important new work provides an essential corrective to the current literature by focusing on people and culture rather than sector efficiency It presents the latest thinking from a diversity of perspectives derived from a major ESRC seminar series and invited contributions from leading researchers Its interdisciplinary approach draws together industry and research and is international in its relevance Through several multidisciplinary themes People and Culture in Construction explores the industry s labour market and the major influences on employment patterns examines how to improve the image and reality of the construction sector as an employer looks at the forces shaping the industry and implications for its stability considers the current composition of the workforce and the potential impacts of workforce diversification analyzes the impact of government targets and policies on construction working practices and culture investigates how to address the skills shortfall currently affecting the industry s performance Cross-border Cultural Production Janet Wasko, 2008 This volume addresses issues revolving around the production of mediated cultural products across borders More specifically the authors consider cross border cultural production in the film and television industries and how it affects and is affected by media centers and more recently established production locations The film and television industries have long been recognized as playing important economic political and cultural roles And while it could be argued that historically these forms of cultural production often have been international endeavors the choice of production sites has become an especially contentious issue during the last few decades as global production has expanded While some factions notably from the US film and television

industries refer to this issue as runaway production this book takes a much broader look at the implications and consequences of this phenomenon Basically cross border production involves the expansion of production away from traditional centers whether to other countries or to other locations within the same country Thus this study covers a wide range of issues involving economic and political considerations as well as creative and aesthetic decision making **The Handbook of Political Economy of Communications** Janet Wasko, Graham Murdock, Helena Sousa, 2014-03-03 Over the last decade political economy has grown rapidly as a specialist area of research and teaching within communications and media studies and is now established as a core element in university programmes around the world The Handbook of Political Economy of Communications offers students and scholars a comprehensive authoritative up to date and accessible overview of key areas and debates Combines overviews of core ideas with new case study materials and the best of contemporary theorization and research Written by many of the best known authors in the field Includes an international line up of contributors drawn from the key markets of North and Latin America Europe Australasia and the Far East *Historical Dictionary of Organized Labor* J. C. Docherty, 2004-02-03 Thoroughly updated this essential reference source introduces scholars to the study of organized labor on the international as well as national level Contains 400 entries describing the labor movements in countries around the world and the important people organizations ideas and political parties involved in organized labor Includes a summary list of past and present international labor leaders lists of global union federations and the affiliated organizations of major national labor federations and analytical lists of the membership of the International Confederation of Free Trade Unions **Industrial and Labor Relations Review**, 2016
