Goldstein,Mehmet C. Oz,2003-09-23 In 1962 Thomas Kuhne coined the term paradigm shift while arguing that human knowledge advances by quantum leaps with interspersed smaller steps Preparation for the major advance is generally not a concerted effort by thought leaders Rather a few or one visionaries gain insights into a process and are able to definitely demonstrate the accuracy of their worldview Often the epiphany does not occur during the intellectual lifetime of the discoverers Medicine has had numerous such paradigm shifts including the compelling reworking of Galen's concepts of the body Of note the scientific world of the time explained the new views by arguing that the human body must have changed between the time of ancient Greece and modern Europe The inauguration of cardiac surgery itself required profound shifts in medicine's view of physiology Yet over the ensuing 40 years the field was fine tuned so we could provide greater than 95% success rates in elective surgery with low cost and short hospital stays In some parts of the world the procedures were viewed as commodities and prices dropped as providers were unable to differentiate the quality of their work As patients and their physicians became more demanding the desire to make the procedures minimally invasive grew In effect what we were really

searching for was a life saving procedure that also preserved quality of life In short minimally invasive has really been a code phrase for procedures that disrupt our quality of life the least *Manned Spacecraft Technologies* Hong Yang,2020-08-26 This book offers essential information on China s human spacecraft technologies reviewing their evolution from theoretical and engineering perspectives It discusses topics such as the design of manned spaceships cargo spacecraft space laboratories space stations and manned lunar and Mars detection spacecraft It also addresses various key technologies e g for manned rendezvous docking and reentry The book is chiefly intended for researchers graduate students and professionals in the fields of aerospace engineering control electronics electrical engineering and related areas *Proceedings of the National Conference on Advanced Manufacturing & Robotics, January 10-11, 2004* S.
