**Television And The Crisis Of Democracy** Douglas Kellner, 2018-02-02 This is one of

the best books I've read on the changing relationship of television to society. It provides a very good analysis of theoretical perspectives on television and makes excellent use of critical theory. An accessible book that at the same time challenges the reader to think more deeply about the role of television in a formally democratic society. Vincent Mosco, Carleton University.

In this pathbreaking study, Douglas Kellner offers the most systematic, critically informed political and institutional study of television yet published in the United States. Focusing on the relationships among television, the state, and business, he traces the history of television broadcasting, emphasizing its socioeconomic impact and its growing political power. Throughout, Kellner evaluates the contradictory influence of television, a medium that has clearly served the interests of the powerful but has also dramatized conflicts within society and has on occasion led to valuable social criticism. Encyclopedia of Television, Horace Newcomb, 2014-02-03. The Encyclopedia of Television, second edition, is the first major reference work to provide description, history, analysis, and information on more than 1100 subjects related to television in its international context. For a full list of entries, contributors, and more, visit the Encyclopedia of Television, 2nd edition website.

*Reality TV's Real Men of the Recession*, Shannon O'Sullivan, 2022-10-11. In this book, Shannon O'Sullivan explores blue-collar frontiers, showing a subgenre of reality television showcasing white working-class men performing hazardous occupations in remote wilderness settings. O'Sullivan argues that the proliferation of these programs represents a subtle yet potent reactionary veneration of white rural working-class men as real Americans amid the Great Recession and social movements challenging white supremacy, heteropatriarchy, and capitalism nearly a decade before Donald Trump kicked off his presidential campaign. Through analyses of *Deadliest Catch*, *Ax Men*, *Ice Road Truckers*, and *Gold Rush*, O'Sullivan reframes dominant understandings of social class and challenges the neoliberal tendency to configure identity and social categories as stylized performances delinked from power relations. The author highlights the political significance of these series in relation to Donald Trump's rhetorical strategy and media narratives about his supporters. O'Sullivan also incorporates an analysis of *Duck Dynasty*, which exemplifies how affluent white men take up stereotypical white rural working-class masculine performances to attain a public perception of masculine authenticity.

Scholars of media studies, gender studies, television studies, communication, and political rhetoric will find this book of particular interest. Library of Congress Subject Headings, Library of Congress, Office for Subject Cataloging Policy, 1992.

Reality TV Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America
