Television Technology And Cultural Form:

Television Raymond Williams, 2003 *Television Technology and Cultural Form* was first published in 1974 long before the dawn of multi channel TV or the reality and celebrity shows that now pack the schedules Yet Williams analysis of television s history its institutions programmes and practices and its future prospects remains remarkably prescient Williams stresses the importance of technology in shaping the cultural form of television while always resisting the determinism of McLuhan s dictum that the medium is the message If the medium really is the message Williams asks what is left for us to do or say Williams argues that on the contrary we as viewers have the power to disturb disrupt and to distract the otherwise cold logic of history and technology not just because television is part of the fabric of our daily lives but because new technologies continue to offer opportunities momentarily outside the sway of transnational corporations or the grasp of media moguls for new forms of self and political expression

Television Raymond Williams, 2004-06-01 First published in 1974 this classic study of TV was ahead of its time introducing ideas about the medium that we now take for granted Raymond Williams is often described as the founder of cultural studies and this book is regarded by many as the founding text of TV studies In the current age of reality TV Williams insights into the danger of TV inundating our lives and an increasingly relentless barrage of images clogging up the airwaves seem remarkably prescient With a new introduction by Roger Silverstone Professor of Media and Communications at the LSE
