Walk with Us and Listen Charles Villa-Vicencio, 2009-09-30 Effective peace agreements are rarely accomplished by idealists The process of moving from situations of entrenched oppression armed conflict open warfare and mass atrocities toward peace and reconciliation requires a series of small steps and compromises to open the way for the kind of dialogue and negotiation that make political stability the beginning of democracy and the rule of law a possibility For over forty years Charles Villa Vicencio has been on the front lines of Africa s battle for racial equality In *Walk with Us and Listen* he argues that reconciliation needs honest talk to promote trust building and enable former enemies and adversaries to explore joint solutions to the cause of their conflicts He offers a critical assessment of the South African experiment in transitional justice as captured in the Truth and Reconciliation Commission and considers the influence of ubuntu in which individuals are defined by their relationships and other traditional African models of reconciliation Political reconciliation is offered as a cautious model against which transitional politics needs to be measured Villa Vicencio challenges those who stress the obligation to prosecute those allegedly guilty of gross violation of human rights replacing this call with the need for more complementarity between the International Criminal Court and African mechanisms to

achieve the greater goals of justice and peace building *Questions and Information Systems* Thomas W. Lauer, Eileen Peacock, Arthur C. Graesser, 2013-04-15 The design and functioning of an information system improve to the extent that the system can handle the questions people ask Surprisingly however researchers in the cognitive computer and information sciences have not thoroughly examined the multitude of relationships between information systems and questions both question asking and answering The purpose of this book is to explicitly examine these relationships Chapter contributors believe that questions play a central role in the analysis design and use of different kinds of natural or artificial information systems such as human cognition social interaction communication networks and intelligent tutoring systems Their efforts show that data structures and representations need to be organized around the questioning mechanisms in order to achieve a quick retrieval of relevant useful information **Hope and Despair in Narrative and Family Therapy** Carmel

Flaskas, Imelda McCarthy, Jim Sheehan, 2007-03-12 How do experiences of hope and despair impact upon our capacity to meet life's challenges in narrative and family therapy Clients experiences of hope and despair can be complex reflecting individual and family histories current patterns and dynamics the stresses of everyday life and the social contexts of families lives This book analyses how therapists meet and engage with these dichotomous aspects of human experience The editors place the themes of hope and despair at the centre of a series of reflections on practice and theory Contributors from all over the world are brought together incorporating a range of perspectives from narrative systemic and social constructionist frameworks The book is divided into three sections covering reflections on hope and despair facing adversity practices of hope reflections on reconciliation and forgiveness Hope and Despair in Narrative and Family Therapy looks at the importance of hope in bringing about positive therapeutic change This book will be of great use to family therapists psychotherapists counsellors and students on therapeutic training courses The Strategic Use of Stories in Organizational Communication and Learning Terrence L. Gargiulo, 2014-12-18 Designed for students and practitioners in the fields of organizational

behavior and human resource training and development this groundbreaking book presents a cutting edge approach to improving organizational communication Drawing on his extensive experience as an organizational development consultant and group process facilitator Terrence Gargiulo shows how the use of storytelling is the key to effective communication and learning Story Harold Scheub, 1998-10-01 What is the essence of story How does the storyteller convey meaning Leading scholar Harold Scheub tackles these questions and more demonstrating that the power of story lies in emotion While others have focused on the importance of structure in the art of story Scheub emphasizes emotion He shows how an expert storyteller uses structural elements image rhythm and narrative to shape a story's fundamental emotional content The storyteller uses traditional images repetition and linear narrative to move the audience past the story's surface of morals and ideas and make connections to their past present and future To guide the audience on this emotional journey is the storyteller's art The traditional stories from South African Xhosa and San cultures included in the book lend persuasive

support to Scheub's These stories speak for themselves demonstrating that a skilled performer can stir emotions despite the obstacles of space time and culture
