two core elements in generating and influencing workplace immoral behavior. However, limited studies have been conducted to explore the emotional cognitive processes or integrative moral emotion cognition system relevant to workplace moral behavior. Despite our knowledge of the antecedents and consequences of workplace immoral behaviors, more research on the generating mechanism, influencing mechanism, transformation mechanism, and governance strategies is needed. For example, it is unclear how exhibiting immoral behavior in the workplace would impact the actor's and the third party observer's emotions, thoughts, feelings, and subsequent behavior. Besides the question of whether ethical/unethical leader behavior would trigger a trickle-down effect, which refers to the fact that how the behavior or perception of the top leaders affects employees from top to bottom along the formal vertical power chain, in addition, we have little knowledge on when, how, and why the ethical employees, the so-called good soldiers, would engage in workplace immoral behavior and vice versa.
