Terrorism in Contemporary France Jan Eichler, 2023-01-29 This book examines radical Jihad terrorism in contemporary France and sheds light on the vicious circle of violence based on reciprocity Building upon the theoretical heritage of Pierre Bourdieu the book develops a methodology and a concept of the vicious circle of violence in France based on three pillars actors dynamics and effects Discussing the development of global terrorism

between the 9 11 attacks and the launch of the European front against global terror in Spain and Great Britain the book goes on to analyze why France has not been attacked during the 2000s and why it in turn became a primary target of terrorist attacks during the 2010s with a special emphasis on communication theory and the concept of reciprocity Studying these attacks on the international level the book offers insights into violent acts of revenge of the radical home grown jihadists for the French military interventions in four Middle Eastern and North African MENA countries especially Libya and Syria It further investigates the following growing radicalization of the Muslim community on the national level as a reason for terrorist attacks Finally the book sheds light on the reactions from within the French military to these developments before closing with a presentation of the new political context after the 2022 presidential and legislative elections Based on empirical evidence and a theoretical background this book will appeal to students and scholars of political science and international relations as well as policy makers and practitioners interested in a better understanding of terrorism French politics and communication theory

abused and innocent people to be victimized by war's profiteers **Contemporary World History Since 1945** Jeffrey W. Jones, 2025-10-10 This book introduces readers to the historical roots of the key events, issues, and themes in the post World War II period since 1945. Organized by region (Europe, Asia, the Middle East, Africa, and Latin America), it uses case studies to emphasize common themes and patterns. The book argues that the colonial period largely shaped the primary global relationships that still hold in the world today. During and after decolonization, the Cold War emerged as the dominant global paradigm, but following the collapse of communism, a neo-liberal capitalist agenda prevailed in much of the world, although that has in turn shifted due to the global financial crisis of the late 2000s/early 2010s. The book explores these themes as well as terrorism and the environmental degradation of the planet, which are major features of the post-Cold War world, along with racial, ethnic, religious diversity and conflict, democracy, human rights, nationalism, and gender relations. This volume is an essential resource for students of Contemporary World History, the World Since 1945, and the World in the Twentieth Century more broadly.
