The Business of Breeding Deborah Kay Fitzgerald,1987 *The Business of Breeding* Deborah Kay Fitzgerald,1990
Fitzgerald history of technology MIT studies the development of one agricultural commodity as a vehicle for delineating the complexities of agricultural history The ambiguous role of agricultural science as a scientific discipline engaged in the practical application of scientific knowledge to social and economic problems is expressed in the politics and goals of land grant universities agribusiness and farmers Annotation copyrighted by Book News Inc Portland OR **The Business of Breeding** Deborah K. Fitzgerald, **The Oxford Handbook of Agricultural History** Jeannie M. Whayne,2024
Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture s potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor **Masterminding Nature** Margaret E. Derry,2015-01-01 Canadian historian Margaret Derry examines the evolution of modern animal breeding from the invention of improved breeding methods in 18th century England to the application of molecular genetics in the 1980s and 1990s **Entomology, Ecology and Agriculture** Paolo Palladino,2013-05-13 This study is facilitated by following economic entomologists and ecologists changing ideas about different pest control strategies chiefly chemical biological and integrated control The author then follows the efforts of one specific group of entomologists at the University of California over three generations from their advocacy of biological controls in the 1930s and 40s through their shifting attention to the development of an integrated pest management in the context of big biology during the 1970s *The Eclipse of Morality* Lawrence Busch, Using the works of Bacon Hobbes and Adam Smith as well as historical examples drawn from the last two centuries Busch shows how the ideas initially proposed by these thinkers became reified as scientism statism and marketism systems of belief that a single mode of ordering could solve the riddle of society and thereby supplant moral responsibility Busch contrasts this approach with concrete examples of successful attempts to extend democracy into these areas to create multiple orderings so that moral responsibility is neither crushingly heavy on individuals nor unbearably light on society **States of Nature** Stuart George McCook,2002-05-15 Traces the history of the intersections between nature economy and nation in the Spanish Caribbean through a history of the agricultural and botanical sciences **Environmental Issues in India** Mahesh Rangarajan,2009 Contributed articles presented at a workshop convened at Department of History Delhi University in September 2005
What Price Better Health? Daniel Callahan,Milbank Memorial Fund,2003-10-06 Medical research with its power to attract money and political support and its promise of cures for a wide range of medical burdens has good and bad sides

which are often indistinguishable In this book the author teases out the distinctions and differences revealing the difficulties that result when the research imperative is suffused with excessive zeal adulterated by the profit motive or used to justify cutting moral corners Exploring the National Institutes of Health s annual budget the inflated estimates of health care cost savings that result from research the high prices charged by drug companies the use and misuse of human subjects for medical testing and the controversies surrounding human cloning and stem cell research he clarifies the fine line between doing good and doing harm in the name of medical progress His work shows that medical research must be understood in light of other social and economic needs and how even the research imperative dedic
