**Horns and Hair of the High Country** Lloyd Antypowich, 2013-10-25 Horns and Hair of the High Country is a fictionalized presentation of the author's extensive understanding of elk grizzly bear mountain goat sheep and the caribou written from the animal's point of view He inserts informative information about nature into each story and at the end he shares with the reader some real life experiences from the human point of view For Lloyd Antypowich going into the mountains for three weeks at a time was far more than a hunting trip It was like going back to school where he could learn the language of the animals of the wild and the untamed country where he could get in tune with Mother Nature That is why he preferred to use horses The quietness in which he traveled allowed him to hear and see animals that he would otherwise have missed When one enters into the domain of the wild the first thing one must learn is to read the signs it is like reading a book It tells you what the animals have been doing Learning that gives one a better understanding of the animals No they don't greet you in the morning and ask you if you had your breakfast yet but they give you a sign and if you can understand it you will know what they are telling you Remember they too have a brain and everything that they see smell or hear puts that body in motion If you wear aftershave and scented soap they will smell you long before you will have seen them In time one can gain their trust and learn a whole lot more about them and that to me is a whole lot more rewarding than overpowering them with a high powered scope

*Sierra Club Bulletin* Sierra Club,1923 Includes section Book reviews     **Religion, Law, and the Land** Brian E. Brown,1999-11-30 Examining a series of court decisions made during the 1980s regarding the legal claims of several Native American tribes who attempted to protect ancestrally revered lands from development schemes by the federal government this book looks at important questions raised about the religious status of land The tribes used the First Amendment right of free exercise of religion as the basis of their claim since governmental action threatened to alter the land which served as the primordial sacred reality without which their derivative religious practices would be meaningless Brown argues that a constricted notion of religion on the part of the courts combined with a pervasive cultural predisposition towards land as private property marred the Constitutional analysis of the courts to deprive the Native American plaintiffs of religious liberty Brown looks at four cases which raised the issue at the federal district and appellate court levels centered on lands in Tennessee Utah South Dakota and Arizona then it considers a fifth case regarding land in northwestern California which

ultimately went to the U S Supreme Court In all cases the author identifies serious deficiencies in the judicial evaluations The lower courts applied a conception of religion as a set of beliefs and practices that are discrete and essentially separate from land thus distorting and devaluing the fundamental basis of the tribal claims It was this reductive fixation of land as property implicit in the rulings of the first four cases that became explicitly sanctioned and codified in the Supreme Court s decision in *Lyng v Northwest Indian Cemetery Protective Association* of 1988 In reaching such a position the Supreme Court injudiciously engaged in a policy determination to protect government land holdings and did so through a shocking repudiation of its own long established jurisprudential procedure in cases concerning the free exercise of religion
