The Calling Of Education The Academic Ethic And Other Essays On Higher Education:

The Calling of Education Edward Shils, 2008-04-15 Throughout his long and prolific career Edward Shils brought an extraordinary knowledge of academic institutions to discussions about higher education The Calling of Education features Shils's most illuminating and incisive writing on this topic from the last twenty five years of his life The first essay The Academic Ethic articulates the unique ethical demands of the academic profession and directs special attention to the integration of teaching and research Other pieces including Shils's renowned Jefferson lectures focus on perennial issues in higher learning the meaning of academic freedom the connection between universities and the state and the criteria for appointing individuals to academic positions Edward Shils understood the university as a great symphonic conductor comprehends the value of each instrument and section both separately and in cooperation The Calling of Education offers Shils's insightful perspective on problems that are no less pressing than when he first confronted them Edward Shils 1910-1995 was distinguished service professor in the Committee on Social Thought and the department of sociology at the University of Chicago Among his many books published by the University of Chicago Press are Portraits A Gallery of Intellectuals and the three volume Selected Papers of Edward Shils

The Academic Citizen Bruce Macfarlane, 2006-09-27 With increasing focus on excellence in research and teaching the service role of the individual academic is often neglected This book calls for greater recognition of this important aspect of academic life highlighting the importance of mentoring committee work and pastoral care in the daily running of universities Drawing from extensive examples from models around the world The Academic Citizen points to the benefits of effective communication with colleagues in the faculty across the university and in corresponding faculties across the world as well as those in maintaining

positive associations with the wider world *In Defense of American Higher Education* Philip G. Altbach, Patricia J. Gumpert, D. Bruce Johnstone, 2003-04-30 The current era in higher education is characterized by increased need for accountability and fiscal constraint coupled with demands for increased productivity Higher education is expected to meet the demand of changing student demographics as well as requests for research and service from government and industry To preserve the academy's ability to meet these demands the editors and contributors to this volume argue that while change is inevitable and desirable any radical alterations to the practices that have established and upheld the excellence of higher education in the United States must be carefully considered The editors and contributors cherish the best ideals of higher education academic freedom commitment to both inquiry and teaching and preservation of an independence of mind and spirit in the face of external pressures At the same time the authors of these essays also reflect upon the failings of higher education including problematic historical legacies such as racism sexism and anti semitism *In Defense of American Higher Education* is a careful analysis of what we have inherited undertaken with a critical eye for constructive reform It will be of interest to anyone concerned about the future of American higher education Citizenship and Higher Education James Arthur, Karen Bohlin, 2005-03-16 This comparative text considers models of higher education in the UK and the US and individuals' perceptions about the role of university in society **Saving Higher Education in the Age of Money** James Engell, Anthony Dangerfield, 2005 The new status of money Prestige money and the ends of higher education Learning for dollars Humanities and the market model university The destruction of reading Means and ends signs and symbols Packaging ethics Leading the self into the world Science art and democracy a partnership The higher utility *The Interlude in Academe* David J. Siegel, 2023-01-17 This book is an exploration of the idea that interludes or disruptions to our usual rhythms rituals and routines offer individuals and institutions alike an incomparable opportunity to examine the governing assumptions that undergird academic work and to experiment with alternative modes and models of intellectual life Using the COVID 19 pandemic as the prime example of an externally imposed interlude on a mass scale the book argues that the compulsion of most colleges and universities to return to business as usual reveals that the business of the academic enterprise is only tangentially about learning ideas or the life of the mind It is mostly about keeping the institutional machinery running at all costs typically at the behest of state and market forces Meanwhile interludes of any size or duration from massively disruptive global pandemics to brief elective personal retreats offer occasions for interrogating our entrenched policies and practices and are simultaneously spaces for the pursuit of learning and idea play both within and beyond institutions *Intellectual Leadership in Higher Education* Bruce Macfarlane, 2013-07-03 This book provides a theoretical exploration of the meaning of intellectual leadership with particular reference to university professors and other senior academics It draws on new international research data online survey and interviews and provides a practical series of ideas and recommendations for defining the role of a university professor **The Emerald Handbook of Higher**

Learning for Meaning's Sake Stephanie Mackler, 2009-01-01 Universities and the societies they serve suffer from a crisis of meaning We have fanatically developed our ability to produce knowledge leaving our ability to craft meaning by the wayside University graduates often have an abundance of knowledge

but lack the wisdom to use it meaningfully Meanwhile people inside and outside academia are searching for meaning but are imprisoned in a lexicon of clichés and sound bites that stunts their quest In response Learning for Meaning's Sake begins with the assertion that higher education in the 21st century should renounce its obsession with job training and knowledge production and should instead turn toward questions of meaning Drawing upon a diverse range of philosophical thought Learning for Meaning's Sake offers the vision and philosophical foundation for a new type of higher learning one that is devoted to the existential questions at the core of human existence **Gendered Academic Citizenship** Sevil

Sümer,2020-09-29 This book proposes the framework of gendered academic citizenship to capture the multidimensional and complex dynamics of power relations and everyday practices in the contemporary context of academic capitalism The book proposes an innovative definition of academic citizenship as involving three key components membership recognition and belonging Based on new empirical data it identifies four ideal types of academic citizenship full limited transitional citizenship and non citizenship The different chapters of the book provide comprehensive reviews of the relevant research literature and offer original insights into the patterns of gender inequalities and practices of gendered academic citizenship across and within different national contexts The book concludes by setting a comprehensive research agenda for the future This book will be of interest to academic researchers and students at all levels in the disciplines of sociology gender studies higher education political science and cultural anthropology *The Virtual University?* Kevin Robins, Frank

The Evolution of College English Thomas P. Miller, 2014-03-18 Thomas P Miller defines college English studies as literacy studies and examines how it has evolved in tandem with broader developments in literacy and the literate He maps out four corners of English departments literature language studies teacher education and writing studies Miller identifies their development with broader changes in the technologies and economies of literacy that have redefined what students write and read which careers they enter and how literature represents their experiences and aspirations Miller locates the origins of college English studies in the colonial transition from a religious to an oratorical conception of literature A belletristic model of literature emerged in the nineteenth century in response to the spread of the penny press and state mandated schooling Since literary studies became a common school subject professors of literature have distanced themselves from teachers of literacy In the Progressive era that distinction came to structure scholarly organizations such as the MLA while NCTE was established to develop more broadly based teacher coalitions In the twentieth century New Criticism came to provide the operating assumptions for the rise of English departments until those assumptions became critically overloaded with the crash of majors and jobs that began in 1970s and continues today For models that will help the discipline respond to such challenges Miller looks to comprehensive departments of English that value studies of teaching writing and language as well as literature According to Miller departments in more broadly based institutions have the potential to redress the historical alienation of English departments from their institutional base in work with literacy Such departments have a potentially quite expansive articulation apparatus Many are engaged with writing at work in public life with schools and public agencies with access issues and with media ethnic and cultural studies With the privatization of higher education such pragmatic engagements become vital to sustaining a civic vision of English studies and the humanities generally

Kant's Conception of Pedagogy G. Felicitas Munzel, 2012-08-31 Although Kant was involved in the education debates of his time it is widely held that in his mature philosophical writings he remained silent on the subject In her groundbreaking *Kant's Conception of Pedagogy* G Felicitas Munzel finds extant in Kant's writings the so called missing critical treatise on education It appears in the *Doctrines of Method* with which he concludes each of his major works In it Kant identifies the fundamental principles for the cultivation of reason's judgment when it comes to cognition beauty nature and the exercise of morality while subject to the passions and inclinations that characterize the human experience From her analysis Munzel extrapolates principles for a cosmopolitan education that parallels the structure of Kant's republican constitution for perpetual peace With the formal principles in place the argument concludes with a query of the material principles that would fulfill the formal conditions required for an education for freedom

The Purpose of Business Albert Erisman, David Gautschi, 2015-10-07 Business is a vital institution for a flourishing society but there is mounting concern

about its role in distorting wealth distribution enabling and rewarding unethical behaviour and despoiling the natural environment A Consortium was formed in 2009 under the leadership of David Gaultschi to bring together academics business people and interested members of society from around the world to discuss two questions what is the purpose of business and what is the role of the business school in the academy Consortium Fellows gathered in eight sessions over five years from 29 countries to discuss debate and share perspectives on these questions The Purpose of Business is an edited collection drawing from the perspectives of these sessions with contributors from North America South America Europe and Asia bringing culturally and intellectually diverse perspectives on these critical questions This multifaceted work offers an exploration of business in relation to religion art neuroscience geopolitics energy and beyond to inspire a better understanding of the role of business in the 21st century interconnected world
