The Canal Builders Anthony Burton,2009 The Canal Builders Robert Payne,1959 The Canal Builders Anthony Burton,2015-11-30 Canal Builders is a classic history book for anyone interested in the development of Britain s canal system The book which was first published in the 1970s is now republished here in a new fifth edition It takes the reader from the middle of the eighteenth century to the start of the railway age in the early nineteenth century Anthony Burton has revised and improved the original text using new material that he has found in archives since it was first published and has added many extra illustrations This is the remarkable story of the many groups of people who were responsible for building Britain s canal system There were industrialists such as Josiah Wedgwood who promoted canals to help his own industry and speculators financed the projects in the hope of a good return The work was planned by engineers some of whom such as James Brindley and Thomas Telford have become famous while others have remained virtually unknown but still did magnificent work This is also the story of the great anonymous army of men who actually did the work the navvies This was the first book ever to study the lives of these labourers in detail Altogether it is an epic story of how the transport route that made the industrial revolution possible was built Well planned and well written There is no better introduction to the early canal age The EconomistLinks End Links Author End Author The Canal Builders John M. Excerpt from History of the Panama Canal Its Construction and Builders In the ensuing pages an effort has been made to tell the plain unvarnished story of Panama and the Panama Canal The information contained herein has been gathered from many publications and from public and private persons The records of the Government have been available at all times to the writer thanks to the courtesy of the authorities at Washington and of Major General Goethals Special acknowledgments are due to the Hon William H Taft who as Secretary of War and President of the United States from 1904 to 1913 directed the affairs of the Panama Canal from its beginning to its virtual completion In 1912 President Taft wrote to the author as follows My dear Mr Bennett I am very glad to hear from you that you contemplate publishing a history of the construction of the Panama Canal There is a great deal of detail connected with it which is forgotten and yet which is interesting to know with respect to the great work There are a good many facts indeed that have never been brought to the public attention that are of record and ought properly to be put in an historical form I shall be very glad myself to furnish you with all the data that I have in my correspondence which covers the whole life of the Canal from the very day that the Canal Zone was turned over

by the Republic of Panama to the United States I am glad that such an enterprise is on foot Cordial encouragement was extended also by the Hon Henry L Stimson Secretary of War and Col George W Goethals Chairman and Chief Engineer of the Isthmian Canal Commission Mr Stimson wrote I think it is very important that a full and careful history of the construction of the Panama Canal should be written while people are still alive in whose memories many of the most important events will rest and I am very glad to hear that you are contemplating publishing such a history I should be glad to put at your disposal all the data that I properly can while in office here in the Department which has had supervision to a certain extent over the work Col Goethals wrote I am very glad to hear from you that you contemplate publishing a history of the construction of the Panama Canal To facilitate you in the enterprise I will take pleasure in authorizing you to collect information from any reliable source and give you access to the records for verification of such information or any additional data that may be available The author is indebted to Prof Patrick J Lennox Professor of English Language and Literature at the Catholic University of America for valuable assistance in preparing the history of the Isthmus of Panama About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Bassett, 1964 **The Canal Pioneers** Anthony Burton, 2017-04-19 This is the story of canals used for transport and the men who built them from the earliest times up to the end of the nineteenth century This is a very long history stones for the pyramids of Egypt were brought to the site by canal and one of the most imposing canal systems ever built the Grand Canal of China was begun in the sixth century BC Development after the end of the Roman Empire was slow but saw the steady improvement of river navigations through locks the mitre gates were actually first designed by Leonardo da Vinci The modern age of canals that cross summits began in France and the most famous of these early waterways was the magnificent Canal du Midi the brainchild of Pierre Paul Riquet completed in 1681 It was a visit to this canal when he was a teenager on the Grand Tour that inspired the Duke of Bridgewater to build his famous canal that inspired a rush of canal construction in Britain Britains canals became the essential transport route that made the countrys industrial revolution possible thanks to engineers such as James Brindley

William Jessop and Thomas Telford It was a period of intensive construction that lasted for fifty years from 1760 It saw many innovations from the use of cast iron for bridges and aqueducts to inclined planes and vertical lifts to move boats from one canal level to another The nineteenth century also saw extensive canal systems developing in North America such as the famous Erie Canal and culminated in two great ship canals at Suez and Panama The book tells an exciting story of canal development and the many men who made it possible **History of the Panama Canal; Its Construction and Builders**
