Goodrich,1851 Great Events in the History of North and South America The plan of the following work whatever may be thought of its execution will commend itself it is believed to the taste and judgment of the public It proceeds upon the principle of selection being chiefly confined to the Great Events of American History and which are treated of as distinct subjects In these respects the work differs from other historical works on the same subject The advantages of a work thus constructed are too obvious to need specification Yet it may be remarked that great events in history are like great objects in

nature and art It is the bolder features of a country the more costly and imposing edifices of the city the higher and more elaborate achievements of art upon which we delight to dwell In like manner great events attract our attention and interest our minds because of their relations because of the higher qualities of mind which perhaps gave them birth and the striking and lasting changes which grow out of them They serve as landmarks in our drift down the stream of time We date from them We refer to them We measure between them We compare them one with another their causes progress influences and in so doing our knowledge of men and things is advanced our false opinions are corrected our topics for interesting and profitable speculation and reflection greatly multiplied A thorough perusal of a work thus constructed will secure it is believed a more competent and permanent knowledge of the history of a country than some half dozen readings of that history written on the ordinary plan The principle of selection will render the work the more valuable to certain classes of persons to those who desirous of a competent knowledge of the history of their country have but a limited time to devote to the study of it to the young whose minds are apt to become wearied and perplexed with the number and details of minor events and to those who wish to refresh their recollections without the labor and loss of time incident to the perusal of works constructed on the common plan Each of these classes will find their interests consulted in the work before them while the general reader may profitably proceed from the perusal of such a volume to those which describe events and details more minutely **A**
