Language Power Byron Renz,2013-03-08 The focus of Language Power Dynamic Progression from Word to Message is on words and how they convey meaning and feeling The microscopic focus on the word itself evolves into the logical organization of words into meaningful sentences paragraphs and document sections The focus is on the somewhat divergent nonfiction elements of information and persuasion From an examination of the principles of information and persuasion the book evolves into an examination of specific applications of the informative and persuasive principles in business letter writing the rsum the cover letter the business plan and the grant proposal Language Power gets the serious student of writing away from the glib advice about writing dos and donts or templates that can simply be copied This is a book about the process of thinking that goes into effective informative and persuasive writing The book teaches the writing process Although the discussion of process is illustrated with examples the examples serve not as templates but to help teach the process The books rationale is that solid academics will ultimately outperform the mundane After examining how words convey meaning words are next examined as collective structures to convey information or persuasion Finally language structures are analyzed in specific forms of business writing

Cosmic Purpose and Human Consciousness Richard A. Mould,2015-11-10 Scientists have constructed a vast and wonderful objective universe by building on the quantitative features of their experience That universe cannot support cosmic purpose because it is without consciousness it is completely inert However the qualitative features of human experience suggest the existence of an equally vast and wonderful subjective universe that complements

the objective universe in scope and in reality This edifice can and I believe does support a form of cosmic purpose that is determined by its structure and by its relationship to human consciousness Every experience of yours is an amalgam of quantitative and qualitative parts that comprise your own objective and subjective worlds Each one is as real a part of your life as the other and each is as real a part of the wider universe as the other There is no reason to assign reality to one and illusory to the other Using a minimal construction based on qualitative experience the subjective universe is found to have a cosmic purpose that is consequential for humans We look for and find evidence of that purpose in human history
