**Repairing the Missional Breach** Kevin Blackwell, 2024-04-02 Making disciples is the primary calling of the church however in the past decades of American evangelicalism there has been a breach of Christ's Great Commission as found in Matt 28:19-20 Much of this failure can be attributed to the doctrine and practice within three modern church movements The book offers a history and critique of modern American evangelical church movements including the Church Growth Emergent Church and Missional Church movements Each of these movements did not result in disciple making multiplication In this book you will find an analysis of disciple making in these movements as compared to the methods and model of Jesus Informed by these critiques formative ministry adjustments are presented as a faithful path for future missional approaches

**The Bridges of Medieval England** David Harrison, 2004-10-07 Medieval bridges are startling achievements of design and engineering comparable with the great cathedrals of the period and are also proof of the great importance of road transport in the middle ages and of the size and sophistication of the medieval economy David Harrison rewrites their history from early Anglo Saxon England right up to the Industrial Revolution providing new insights into many aspects of the subject Looking at the role of bridges in the creation of a new road system which was significantly different from its Roman predecessor and which largely survived until the twentieth century he examines their design Often built in the most difficult circumstances broad flood plains deep tidal waters and steep upland valleys they withstood all but the most catastrophic floods He also investigates the immense efforts

put into their construction and upkeep ranging from the mobilization of large work forces by the old English state to the role of resident hermits and the charitable donations which produced bridge trusts with huge incomes The evidence presented in The Bridges of Medieval England shows that the network of bridges which had been in place since the thirteenth century was capable of serving the needs of the economy on the eve of the Industrial Revolution This has profound implications for our understanding of pre industrial society challenging accepted accounts of the development of medieval trade and communications and bringing to the fore the continuities from the late Anglo Saxon period to the eighteenth century This book is essential reading for those interested in architecture engineering transport and economics and any historian sceptical about the achievements of medieval England

**Inspirations of the Heart Volume 42~Exalted Faith The Awe of God** Ollie Fobbs, 2018-12-15 Inspirations of the Heart Exalted faith is about the will of God coming alive in our lives now mind you what you see in this text is only a mere portion of what could have been said In other words This work could have been 20 chapters with several more spiritual redirections with many more spiritual inputs of directives and spiritual points to consider The thing about me is that I pay attention to the Holy Spirit speaking to me when I write what happens then is that when the Spirit reveals to me to stop and move on I do not go on and put more of me into what is being said that would be disobedience The power of the presence of God is everywhere all of the time but in a recent book I wrote I considered the idea of what I call the ethics of supply and demand what do I mean When it comes down to the presence of God within our lives if our desire is all about us we cut God out of the picture and he cannot supply to us the desires of our heart even though he wants to
