Union of African States in the 21st Century E. Ike Udogu, 2010-02-19 Confronting the Challenges and Prospects in the Creation of a Union of African States in the 21st Century frames the discourse around the important issue of African unification against the backdrop of the region's political and economic marginalization. Arguably the richest continent in the world in terms of its abundant untapped natural resources and human capital, it still lags behind the other regions of the world developmentally. Undeniably, Africa is at the crossroads in this millennium within the context of the powerful events and effects of the New Globalization. One of the central issues that academics and political actors interested in African development must tackle immediately is how to make the region politically and economically relevant in global affairs. These objectives could be attained through continental amalgamation. Accordingly, this book debates and suggests inter alia strategies that might advance Africa's unification effort in order to provide the politico-economic clout needed to spur continental development. Further, it argues that such a Union of African States is critical for promoting the good political life for all Africans.

The Law & Politics of Brexit: Volume II Federico Fabbrini, 2020-11-05 The book provides the first comprehensive analysis of the withdrawal agreement concluded between the United Kingdom and the European Union to create the legal framework for Brexit. The book, which builds on a prior volume, *The Law Politics of Brexit* (OUP 2017), overviews the process of Brexit negotiations that took place between the UK and the EU from 2017 to 2019 and examines the key provisions of the Brexit deal. The volume assesses the withdrawal agreement provisions on the protection of citizens' rights, the Irish border, and the financial settlement, as well as the governance provisions on transition, decision making, and adjudication, and the prospects for future EU-UK trade relations. Finally, the book reflects on the longer-term challenges that the implementation of the 2016 Brexit referendum poses for the UK territorial system, for British-Irish relations, as well as for the future of the EU beyond Brexit.

June 1940, Great Britain and the First Attempt to Build a European Union Andrea Bosco, 2016-06-22 June 2016 represents a significant moment in British history. The decision to leave the European Union at the most critical period since its existence could bring unpredictable and far-reaching consequences both for the United Kingdom and the Union itself. June 1940 was also a turning point in British history. On the afternoon of 16 June, a few hours before the French Government opted for the capitulation, Churchill made on behalf of the British Government an offer of indissoluble union. When a sceptical Churchill put forward to the British Cabinet the text of the declaration drafted by Jean Monnet, Sir Arthur Salter, and Robert Vansittart, he was surprised at the amount of support it received. The Cabinet adopted the document with some minor amendments, and de Gaulle, who saw it as a means of keeping France in the war, telephoned Reynaud with the proposal for an indissoluble union with joint organs of defence, foreign, financial, and economic policies, a common citizenship, and a single War Cabinet. The proposal, however, never reached the table of the French Government. The spirit of capitulation embodied in

Weygand and Ptain prevailed and France submitted herself to the German will for the second time in seventy years After the Munich crisis Great Britain had to face the danger of another European war with the inevitable loss of the Empire and it was at this point that the country first began to favour the application of the federalist principle to Anglo French relations In this conversion to federalism a fundamental role was played by the Federal Union the first federalist movement organised on a popular basis The contribution of Federal Union to the development of the federal idea in Great Britain and Europe was to express and organise the beginning of a new political militancy and it represented the first step of a historical process the overcoming of the nation State the modern political formula which institutionalises the political division of mankind This study principally examines the first eighteen months of the Federal Union during which time it was able to raise itself to the attention of the general public and the political class as the heir of the League of Nations Union The research is based on extensive unpublished archival material found across the globe from London Oxford Brighton and Edinburgh to Washington Paris and Geneva

Emerging Federal Structures in the Post-Cold War Era Soeren Keil,Sabine Kropp,2022-05-18 This book conceives federalism not as a static institutional architecture but as a dynamic formation always in flux This may entail processes of federalization but in some cases also lead to de federalization It looks at emerging federal structures worldwide and analyses federal structures their emergence operation and categorization The contributors highlight that the emergence of these federal structures has multiple facets from the recognition of ethnic diversity to the use of federalism as a tool of conflict resolution Identifying and categorizing processes of federalization and defederalization in a variety of cases the book provides much needed empirical and theoretical discussion on emerging federal structures and the changing nature of federalism in the post Cold War era

The imperial Commonwealth Wm. Matthew Kennedy,2023-07-25 From the late 1800s to the early 1900s Australian settler colonists mobilised their unique settler experiences to develop their own vision of what empire was and could be Reinterpreting their histories and attempting to divine their futures with a much heavier concentration on racialized visions of humanity white Australian settlers came to believe that their whiteness as well as their Britishness qualified them for an equal voice in the running of Britain s imperial project Through asserting their case many soon claimed that as newly minted citizens of a progressive and exemplary Australian Commonwealth white settlers such as themselves were actually better suited to the modern task of empire Such a settler political cosmology with empire at its center ultimately led Australians to claim an empire of their own in the Pacific Islands complete with its own unique

imperial governmentality The Idea of Greater Britain Duncan Bell, 2011-04-17 During the tumultuous closing decades of the nineteenth century as the prospect of democracy loomed and as intensified global economic and strategic competition reshaped the political imagination British thinkers grappled with the question of how best to organize the empire Many found an answer to the anxieties of the age in the idea of Greater Britain a union of the United Kingdom and its settler colonies in Australia Canada New Zealand and southern Africa In The Idea of Greater Britain Duncan Bell analyzes this fertile yet neglected debate examining how a wide range of thinkers conceived of this vast Anglo Saxon political community Their proposals ranged from the fantastically ambitious creating a globe spanning nation state to the practical and mundane reinforcing existing ties between the colonies and Britain But all of these ideas were motivated by the disquiet generated by democracy by challenges to British global supremacy and by new possibilities for global cooperation and communication that anticipated today's globalization debates Exploring attitudes toward the state race space nationality and empire as well as highlighting the vital theoretical functions played by visions of Greece Rome and the United States Bell illuminates important aspects of late Victorian political thought and intellectual life **The International Thought of Alfred Zimmern**

Tomohito Baji, 2021-03-11 This book is a comprehensive examination into the shifting international thought of Alfred Zimmern a Grecophile intellectual one of the most prominent liberal internationalists and the world's first professor of IR Identifying the writings of Burke and cultural Zionism as two important ideological sources that defined his project for empire and global order this book argues that Zimmern can best be understood as an apostle of Commonwealth It shows that while his proposals changed from cosmopolitan democracy to Euro Atlanticism and to world federal government they were constantly shaped by the organizing principles of a professedly universal British Commonwealth It was the empire transhistorically chained to classical Athens **The Balancing Act** Atsuko Ichijo, 2017-01-10 This is a careful examination

of the historical formation of Britain and of key moments in its relations with the European powers The author looks at the governing discourses of politicians the mass media and the British people The rhetoric of sovereignty among political elites and the population at large is found to conceive of Britain's engagement with Europe as a zero sum game A second theme is the power of geographical images island Britain in feeding the idea of the British nation as by nature separate and autonomous It follows that the EU is seen as other and involvement in European decision making tends to be viewed in terms of threat This is naive as nation states are not autonomous economically militarily or politically Only pooling sovereignty can maximize their national interests Atsuko Ichijo is Senior Researcher in European Studies at Kingston University *Richard Seddon: King of God's Own* Tom Brooking, 2014-08-27 2014 Must Read Otago Daily Times The life the health the intelligence
