### Influence of Inter- and Intra-Synaptic Factors on Information Processing in the Brain Vito Di Maio, Jean-Marie C.

Bouteiller, 2019-10-14 Any brain activity relies on the interaction of thousands of neurons each of which integrating signals from thousands of synapses While neurons are undoubtedly the building blocks of the brain synapses constitute the main loci of information transfer that lead to the emergence of neuronal code Investigating synaptic transmission constitutes a multi faceted challenge that brings together a large number of techniques and expertise ranging from experimental to computational approaches bringing together paradigms spanning from molecular to neural network level In this book we have collected a series of articles that present foundational work aimed at shedding much needed light on brain information processing synaptic transmission and neural code formation Some articles present analyses of regulatory mechanisms

underlying neural code formation and its elaboration at the molecular level while others use computational and modelling approaches to investigate at synaptic neuronal and inter neuronal level how the different mechanisms involved in information processing interact to generate effects like long term potentiation LTP which constitutes the cellular basis of learning and memory This collection although not exhaustive aims to present a framework of the most used investigational paradigms and showcase results that may in turn generate novel hypotheses and ideas for further studies and investigations

**OSTEOPOROSIS** Reiner Bartl, Bertha Frisch, 2013-06-29 Osteoporosis is indeed a global threat because every human being is vulnerable and subject to it as time goes by The authors point out the enormous scale of the problem in terms of human suffering morbidity and mortality on the one hand and the astronomical national costs on the other The book is upbeat and optimistic with a touch of humour it is scientifically based but provides easy to follow guidelines for lifelong maintenance of skeletal structure and function Osteoporosis is preventable if doctors want to and every doctor can contribute Bone is every doctor's and every body's business
