war are seldom if ever simply a negation or reversal of the effects of peace on tourism The volume draws on a range of examples from medieval times to the present to reveal the multi faceted development of tourism amidst and because of conflict in a wide variety of locations including the Pacific Europe the Middle East North America Africa and South East Asia showing the diverse ways in which tourism and war interacts In doing so it explores how some locations have been developed as tourist attractions primarily because of war and conflict e q as resting and training places for troops and others flourished because of the threat of danger from conflicts to more traditional tourist locations. This thought provoking volume contributes to the understanding of the interrelationships between war peace and tourism in many different parts of the world at different scales It will be valuable reading for all those interested in this topic as well as dark tourism battlefield tourism and heritage tourism European Warfare, 1350-1750 Frank Tallett, D. Brauer, Hubert van Tuyll, 2024-05-31 Castles Battles and Bombs reconsiders key episodes of military history from the point of view of economics with dramatically insightful results For example when looked at as a question of sheer cost the building of castles in the High Middle Ages seems almost inevitable though stunningly expensive a strong castle was far cheaper to maintain than a standing army The authors also reexamine the strategic bombing of Germany in World War II and provide new insights into France's decision to develop nuclear weapons Drawing on these examples and more Brauer and Van Tuyll suggest lessons for today s military from counterterrorist strategy and military manpower planning to the use of private military companies in Afghanistan and Iraq In bringing economics into assessments of military history the authors also bring illumination The authors turn their interdisciplinary lens on the mercenary arrangements of Renaissance Italy the wars of Marlborough Frederick the Great and Napoleon Grant's campaigns in the Civil War and the strategic bombings of World War II The results are invariably stimulating Martin Walker Wilson Quarterly This study is serious creative important As an economist I am happy to see economics so professionally applied to illuminate major decisions in the history of warfare Thomas C Schelling Winner of the 2005 Nobel Prize in Economics The Cambridge Illustrated History of Warfare Geoffrey Parker, 2021-08-05 The new edition of The Cambridge Illustrated History of Warfare offers an updated comprehensive account of Western warfare from its origins in Classical Greece and Rome through the Middle Ages and the early modern period down to the wars of the twenty first century in Afghanistan Iraq and Syria Noble Ideals and Bloody Realities Niall Christie, Maya Yazigi, 2006-04-01 The contributions presented in this volume address several issues related to the topic of medieval warfare from a variety of disciplinary perspectives and examining a number of geographical regions The contributors analyze social and economic issues military strategy technological and medical developments ideology and rhetoric and address warfare in Europe the Byzantine Empire and the Muslim world In three parts the contributors explore warfare in theory warfare in practice and warfare as perceived through medieval and modern historiography In doing so they present a number of engaging case studies that will be of use to students and scholars interested in warfare and its effects on medieval society War and Nation in the Theatre of Shakespeare and His Contemporaries Simon Barker, 2007-11-21 This original study explores a vital aspect of early modern cultural history the way that warfare is represented in the theatre of Shakespeare and his contemporaries The book contrasts the Tudor and Stuart prose that called for the establishment of a standing army in the name of nation discipline and subjectivity and the drama of the period that invited critique of this imperative Barker examines contemporary dramatic texts both for their radical position on war and in the case of the later drama for their subversive commentary on an emerging idealisation of Shakespeare and his work The book argues that the early modern period saw the establishment of political social and theological attitudes to war that were to become accepted as natural in succeeding centuries Barker's reading of the drama of the period reveals the discontinuities in this project as a way of commenting on the use of the past within modern warfare The book is also a survey and analysis of literary theory
