The New Canadian Political Economy Wallace Clement,Glen Williams,1989 Studies in political economy are now at a crossroads The revival of political economy as an important area of research in Canada began in the early 1970s with the publication of Kari Levitt s *Silent Surrender* In 1976 it was launched in earnest by the fi **The Myth of the North American City** Michael Goldberg,John Mercer,2011-11-01 The continuing tendency to continentalize Canadian issues has been particularly marked in the area of urban studies where United States based research findings methodologies and attitudes have held sway In this book Goldberg and Mercer demonstrate that the label North American City as widely used is inappropriate and misleading in discussion of the distinctive Canadian urban environment Examining such elements of the cultural context as mass values social and demographic structures the economy and political institutions they reveal salient differences between Canada and the United States One of the most important of the many contextual differences is the strong collective sense in Canada which accepts more public intervention in social and economic matters in contrast to the American commitment to individualism Canadians consequently expect a livable central city which is compact and well served by public transit and which has a fiscally sound local government To demonstrate these issues the discussion includes a detailed cross national empirical analysis of over 300 North American metropolitan areas along some three dozen dimensions including density transportation household change and structure income and fiscal disparities and economic structure Since much urban planning in Canada is based upon the continentalist assumption this volume should generate a reassessment of policy and encourage the development of a research base to suit the distinctiveness of the Canadian experience With growing pressures to take a North American view of Canadian policies it is vitally important that the differences delineated in this book are understood not just for their urban policy implications but for broader purposes as well Marxist Phoenix Murray E.G. Smith,2014-05-05 Looking to an increasingly perilous and inequitable future many

progressive activists and scholars are seriously questioning the capacity of global capitalism to guarantee the conditions for human well being and sustainability in the 21st century This development inspires the central inquiry of Marxist Phoenix Will the intensifying contradictions and multiple crises of contemporary capitalism incite the emergence of a mass socialist workers movement committed not merely to the reform of capitalism but to its overthrow This collection of new and previously published essays articles and book chapters written over the last two decades makes the case for the indispensability of the Marxist socialist project to the emancipation of humanity from material insecurity and ever worsening social antagonism Only a global workers movement committed to the fundamental tenets of Marxism a triumphant Marxist Phoenix rising from the ashes of the multiple defeats of the 20th century can open the road to real social progress Interdisciplinary rigorous and critically engaged with many currents in contemporary academic discourse this volume is a timely contribution to the rebirth of a Marxist socialism that is at once scientific emancipatory and internationalist in its commitments

Measuring the Mosaic Rick Helmes-Hayes, 2010-01-28 Measuring the Mosaic is a comprehensive intellectual biography of John Porter 1921 1979 author of *The Vertical Mosaic* 1965 preeminent Canadian sociologist of his time and one of Canada's most celebrated scholars In the first biography of this important figure Rick Helmes Hayes provides a detailed account of Porter's life and an in depth assessment of his extensive writings on class power educational opportunity social mobility and democracy While assessing Porter's place in the historical development of Canadian social science Helmes Hayes also examines the economic social political and scholarly circumstances including the Depression World War II post war reconstruction the baby boom and the growth of universities that contoured Porter's political and academic views Using extensive archival research correspondence and over fifty original interviews with family colleagues and friends *Measuring the Mosaic* stresses Porter's remarkable contributions as a scholar academic statesman senior administrator at Carleton University and engaged practical public intellectual

Politics and Ideology in Canada Michael Ornstein, Michael Stevenson, 2003-02-18 Winner of the Harold Adams Innis Prize *Politics and Ideology in Canada* examines a period of crucial historical change in Canada beginning in the mid 1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive downsizing of state involvement in the economy and society Using class and ideology as key concepts Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys conducted between 1975 and 1981 The surveys cover an exceptionally broad spectrum of political issues including social programs civil and economic rights economic policy foreign ownership labour relations and language issues and sovereignty A wide ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s built around public support for the institutions of the Canadian welfare state But there was also widespread public alienation from politics Public

opinion was quite strongly linked to class but not to party politics Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada Much deeper ideological divisions separated the elites with a dramatic polarization between corporate and labour respondents State elites fell between these two though generally more favourable to capital The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs free trade privatization and deregulation
