Speaking For Results:

Speak and Get Results Sandy Linver, Jim Mengert, 1994-05-31 We've all known the naturals people who can get up to speak in any business situation and make something happen. They get the budget approved, win the big account, get the group's support at the weekly staff meeting. When the naturals finish speaking, people believe and act. Now fully revised and updated, *Speak and Get Results* helps you to be a natural. It helps you to get the results you want by teaching you how to motivate your listeners to reach your result, choose an opening that targets your ideas, design visuals that support you, not sabotage you, use your body and your voice to express your energy, authority, and commitment, handle tough Q & A sessions, audience resistance, and even surprise media encounters.

Speaking in a Second Language Rosa Alonso

Alonso, 2018-04-15 For millions of individuals all over the world, speaking in a second language is a daily activity. It is therefore important that research in applied linguistics should contribute empirically to the study of second language spoken interaction. The aim of this volume is to make such a contribution by providing research-based insights into current approaches to the teaching and learning of this skill. Two key dimensions define the papers included here: their novelty and scope. First, the book provides a novel approach to the study of speaking in a second language by combining recent findings in usage-based linguistics with current issues in teaching. Second, the chapters cover a range of theoretical perspectives, including sociolinguistic and interactional competence, gestures, dynamic systems theory, and code switching. The volume offers a contemporary analysis of research in second language speaking that will be of interest to researchers, graduate students, teachers, and other professionals working in the fields of communication and applied linguistics.

A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology Renee Fabus, 2024-06-01 Learning to assess speech and language disorders and write diagnostic reports may be an overwhelming experience, especially when most texts don't cover both topics at once. With that in mind, *A Guide to Clinical Assessment and Professional Report Writing in Speech-Language Pathology*, Second Edition, combines the latest assessment protocols and diagnostic techniques with vital diagnostic report writing tools into a single definitive guide. Cyndi Stein, Rubin, Renee Fabus, and their contributors recognize

that clinical assessment is inextricably linked to report writing and have updated this Second Edition to synthesize the two. Following the introductory chapters which discuss the basics of assessment and report writing, each subsequent chapter focuses on a particular disorder, provides in-depth assessment tools, and presents a corresponding sample report. Key features include an inventory and explanation of formal and informal assessment measures, a glossary of key vocabulary, sample case histories with assessment tools, relevant and useful interview questions, each disorder's background and characteristics, assessment parameters, a differential diagnosis section, a model report, and the accessible format of *A Guide to Clinical Assessment and Professional Report Writing in Speech Language Pathology*. Second Edition will help students learn how to assess and document speech and language disorders and will also make for a perfect reference for them as clinicians for years to come.

English Language Proficiency Assessments for Young Learners Mikyung Kim Wolf, Yuko Goto Butler, 2017-05-25 *English Language Proficiency Assessments for Young Learners* provides both theoretical and empirical information about assessing the English language proficiency of young learners. Using large-scale standardized English language proficiency assessments developed for international or U.S. contexts as concrete examples, this volume illustrates rigorous processes of developing and validating assessments with considerations of young learners' unique characteristics. In this volume, young learners are defined as school-age children from approximately 5 to 13 years old learning English as a foreign language (EFL) or a second language (ESL). This volume also discusses innovative ways to assess young learners' English language abilities based on empirical studies, with each chapter offering stimulating ideas for future research and development work to improve English language assessment practices with young learners. *English Language Proficiency Assessments for Young Learners* is a useful resource for students, test developers, educators, and researchers in the area of language testing and assessment.

Progress in Speech Synthesis Jan P.H. van Santen, 1997 This collection of articles by leading researchers in each of the fields involved in text-to-speech synthesis provides a picture of recent work in laboratories throughout the world and of the problems and challenges that remain by providing samples of synthesized speech as well as video demonstrations for several of the synthesizers discussed. The book will also allow the reader to judge what all the work adds up to: that is, how good is the synthetic speech we can now produce.

Pronouns and Clitics in Early Language Pilar Larranaga, Pedro Guijarro-Fuentes, 2012-08-31 Traditional grammars have stated that clitics are subject or object pronouns whose distributional features make them different from personal pronouns. This book focuses on the acquisition of personal and demonstrative pronouns as well as clitics with respect to determinative phrases in a variety of languages of the Romance family and several indigenous languages such as Quechua. A particularly original aspect of the present volume is that it not only addresses syntactic issues but also semantic and pragmatic questions that have been widely neglected in the literature. It also reports on acquisition data of languages such as Quechua which have not attracted the attention of researchers until very recently.

A sociolinguistic investigation of multilingualism in the Canton of Ticino Switzerland Jürgen B. Heye, 2017-12-04 No detailed description available for A sociolinguistic investigation of multilingualism in the Canton of Ticino Switzerland

Conversation and intonation in autism Simon Wehrle, 2023-11-10 This book provides an in depth multi dimensional analysis of conversations between autistic adults The investigation is focussed on intonation style turn taking and the use of backchannels filled pauses and silent pauses Previous findings on intonation style in the context of autism spectrum disorder ASD are contradictory with claims ranging from characteristically monotonous to characteristically melodic intonation A novel methodology for quantifying intonation style is used and it is revealed that autistic speakers tended towards a more melodic intonation style compared to control speakers in the data set under investigation Research on turn taking the organisation of who speaks when in conversation in ASD is limited with most studies claiming a tendency for longer silent gaps in ASD No clear overall difference in turn timing between the ASD and the control group was found in the data under study There was however a clear difference between groups specifically in the earliest stages of dialogue where ASD dyads produced considerably longer silent gaps than controls Backchannels listener signals such as mmhm or okay have barely been investigated in ASD to date The current analysis shows that autistic speakers produced fewer backchannels per minute particularly in the early stages of dialogue and that backchannels were less diverse prosodically and lexically Filled pauses hesitation signals such as uhm and uh in ASD have been the subject of a handful of previous studies most of which claim that autistic speakers produced fewer uhm tokens specifically It is shown that filled pauses were produced at an identical rate in both groups and that there was an equivalent preference of uhm over uh ASD speakers differed only in the prosodic realisation of filled pauses It is further

shown that autistic speakers produced more long silent within speaker pauses than controls The analyses presented in this book provide new insights into conversation strategies and intonation styles in ASD as reviewed in a summary analysis The findings are discussed in the context of previous research general characteristics of cognition in ASD and the importance of studying communication in interaction and across neurotypes *Traffic and Transport Psychology* Talib

Rothengatter, Raphael Denis Huguenin, 2004-09-08 This volume gives an overview of the trends in Traffic and Transport Psychology It reflects the considerable development of the most important factors for driving a road vehicle and the variety of international research approaches The first part contains basic approaches and integrated models as well as general theories and their implementation into Traffic and Transport Psychology The second part deals with the driver especially cognition performance social and differential effects and impairment Important aspects are treated such as speed perception reaction times interaction risk acceptance aggression and gender differences Special chapters refer to performance and fatigue The third part focuses on safety driver support selection and influencing drivers by enforcement training and programs for the rehabilitation of traffic offenders Classic ergonomic methods are discussed as well as modern telematic devices or trends regarding driver assessment In the last part current developments are presented in relation to better mobility and the protection of the environment Questions are asked such as whether we could reduce the use of cars how travel behaviour can be modified or to what extent the use of alternatives to motor vehicles benefits safety as well as the environment This work is not only important for psychologists It should be read by all transport professionals interested in the application of psychology to traffic *How Machines Came to Speak* Jennifer Petersen, 2022-01-24 In *How Machines*

Came to Speak Jennifer Petersen constructs a genealogy of how legal conceptions of speech have transformed over the last century in response to new media technologies Drawing on media and legal history Petersen shows that the legal category of speech has varied considerably evolving from a narrow category of oratory and print publication to a broad abstract conception encompassing expressive nonverbal actions algorithms and data She examines a series of pivotal US court cases in which new media technologies such as phonographs radio film and computer code were integral to this shift In judicial decisions ranging from the determination that silent films were not a form of speech to the expansion of speech rights to include algorithmic outputs courts understood speech as mediated through technology Speech thus became disarticulated from individual speakers By outlining how legal definitions of speech are indelibly dependent on technology Petersen demonstrates that future innovations such as artificial intelligence will continue to restructure speech law in ways that threaten to protect corporate and institutional forms of speech over the rights and interests of citizens **Findings and**
