The volume seeks to answer a number of key questions at the intersection of these two fields including how do negative interpersonal emotions manifest in the context of Chinese culture? What connections exist between emotions and interpersonal dynamics? In what ways are these emotions intertwined with the moral framework of Chinese society? How are such negative emotions effectively navigated and regulated? The analysis goes beyond mere examination of emotional expressions delving into the cultural nuances that shape the understanding and handling of emotions. The book elucidates for instance how unmet ganqing expectations can trigger emotions like anger and sadness and in turn the employment of rapport management strategies in their mitigation. The book provides profound insights into a previously overlooked and little understood area of study making it of interest to students and researchers in pragmatics, discourse analysis, communication studies and psychotherapy. *Handbook of Research on Synthesizing Human Emotion in Intelligent Systems and Robotics* Vallverdú, Jordi, 2014-11-30 Emotions convey significant information through means of natural language analysis, embodiment and emotional signing.
