Intuitive Knowing as Spiritual Experience Phillip H. Wiebe, 2015-09-16 This book is Wiebe's defense of the claim that a significant form of spiritual experience is found in knowing something we have no right to know He selects forty five first hand accounts from a data base at the University of Wales to make his case and in solidarity with those people recounts something of his own experience

Engendered Death Joseph W. Laythe, 2011-12-16 **Engendered Death Pennsylvania Women Who Kill** is an historical and interdisciplinary study of women who kill in Pennsylvania from the 18th century to the present It is not an examination of what motivates women to kill although the reader may deduce that from the case studies included Instead it is an examination of how society perceives women who kill and how the gender lens is applied to them throughout the legal process in the media and in the courtroom What makes this work particularly unique is its combination of both scholarly analysis and narrative case studies As such it will appeal to both the scholar and the reader of true crime non fiction If we are to recognize the complex variables at play in all criminal offenses we will need to understand that the laws of a community its social values its politics economics and even geography play a factor in what laws are enforced and against whom they are enforced The decision to define and label certain behaviors and certain people was based on social political and economic considerations of each community Thus the commission of murder by a woman in Arizona may have a variety of factors associated with it that are not present in the case of a woman who murdered her husband in Maine This study in part because of the volume of cases and in part to limit the variables affecting the cases has limited its scope of women killers to the state of Pennsylvania Pennsylvania is the ideal state to study because of its long and stable legal and political traditions its historically diverse population and the large number of newspapers that will help us gauge the public's view of women and women who kill By limiting our scope to one state we know that the legal definitions are fairly consistent for all of the women during a certain period and we can more easily identify the shifts in social values regarding women and homicide

Piven,Chris Boyd,Henry W. Lawton,2002 *Seeking the Compassionate Life* Carl Goldberg, Virginia Crespo,2004-06-30 Morality is a subject most ignored and little understood by modern psychological investigation Why a person acts honorably or heinously is one of the most puzzling and least answered questions regarding human behavior Here the authors posit that despite the fact that hatred and arrogance continually battle compassion and decency as humanity s driving force people continue to develop altruism empathy and concern for others Goldberg and Crespo demonstrate seven factors crucial to achieving a compassionate life Goldberg and Crespo take us inside their treatment rooms through history across cultures and into their own personal worlds at large to meet clients and acquaintances including a would be rapist a virtuous stalker an adulterous minister and a young boy with little more than a matchbook and some pride to call his own Together the stories of these clients and historical figures including Nazis at Nuremberg reflect a vital theme Virtuous behavior should not be a mystery Morality is a subject most ignored and little understood by modern psychological investigation Why a person acts honorably or heinously is one of the most puzzling and least answered questions regarding human behavior The authors demonstrate that although within every human breast hatred and arrogance battle compassion and decency as a driving force people do indeed develop altruism empathy and concern for others Goldberg and Crespo outline seven crucial factors in the

achievement of a compassionate life This book addresses two audiences First it questions modern psychological scientists who have ignored the importance of compassion virtue and morality focusing instead on contrived experimental situations rather than pursuing investigations in as part of the actual world in which we live Yet it is also written for all people concerned with the moral crisis in contemporary society and all people seeking personal and social solutions to deal with this crisis

Emotions, Crime and Justice Susanne Karstedt, Ian Loader, Heather Strang, 2011-04-01 The return of emotions to debates about crime and criminal justice has been a striking development of recent decades across many jurisdictions This has been registered in the return of shame to justice procedures a heightened focus on victims and their emotional needs fear of crime as a major preoccupation of citizens and politicians and highly emotionalised public discourses on crime and justice But how can we best make sense of these developments Do we need to create emotionally intelligent justice systems or are we messing recklessly with the rational foundations of liberal criminal justice This volume brings together leading criminologists and sociologists from across the world in a much needed conversation about how to re calibrate reason and emotion in crime and justice today The contributions range from the micro analysis of emotions in violent encounters to the paradoxes and tensions that arise from the emotionalisation of criminal justice in the public sphere They explore the emotional labour of workers in police and penal institutions the justice experiences of victims and offenders and the role of vengeance forgiveness and regret in the aftermath of violence and conflict resolution The result is a set of original essays which offer a fresh and timely perspective on problems of crime and justice in contemporary liberal democracies

Judaism and Genocide Jerry S. Piven, Chris Boyd, Henry Lawton, 2002 Judaism and Genocide Psychological Undercurrents of History Volume IV returns to the Holocaust

and the analysis of anti-Semitism in a time when racial hatred, ethnic cleansing and apocalyptic fantasy are resurgent. Why do people seek to exterminate other cultures and peoples? How can people inflict violent atrocity without feeling horror or compassion? The authors of this volume address these questions to understand the psychodynamics of hatred, mass violence and the genocidal impulse, phenomena which thrive even today.

From Morality to Mental Health
Mike W. Martin, 2006-04-20. Morality and mental health are now inseparably linked in our view of character. Alcoholics are sick yet they are punished for drunk driving. Drug addicts are criminals but their punishment can be court-ordered therapy. The line between character flaws and personality disorders has become fuzzy with even the seven deadly sins seen as mental disorders. In addition to pathologizing wrong doing, we also psychologize virtue: self-respect becomes self-esteem, integrity becomes psychological integration and responsibility becomes maturity. Moral advice is now sought primarily from psychologists and therapists rather than philosophers or theologians. In this wide-ranging accessible book, Mike W. Martin asks: are we replacing morality with therapy in potentially confused and dangerous ways, or are we creatively integrating morality and mental health? According to him, it's a little bit of both. He surveys the ways in which morality and mental health are related, touching on practical concerns like love and work, self-respect and self-fulfillment, guilt and depression, crime and violence and addictions. Terming this integrative development the therapeutic trend in ethics, Martin uses examples from popular culture, various moral controversies and draws on a line of thought that includes Plato, the Stoics, Freud, Nietzsche and contemporary psychotherapeutic theories. Martin develops some interesting conclusions among them that sound morality is indeed healthy and that moral values are inevitably embedded in our conceptions of mental health. In the end, he shows how both morality and mental health are inextricably intertwined in our pursuit of a meaningful life. This book will be of interest to philosophers, psychologists, psychiatrists and sociologists as well as the general reader.

Encyclopedia of Religious and Spiritual Development
Elizabeth M. Dowling, W. George Scarlett, 2006. Focuses on the developmental process of religion and spirituality across the human life span. This encyclopedia joins a recent trend in research and scholarship aimed at better understanding the similarities and differences between world religions and spiritualities, between expressions of the divine and between experiences of the transcendent.

God and Other Spirits
Phillip H. Wiebe, 2004. Wiebe advocates the naturalizing of supernaturalism so that preoccupation with proofs is at least supplemented if not replaced by investigation of how belief in God and other spirits arises out of experience.
