Metaphor and Hidden Ideology Andrew Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor's reductionist tendencies
