1920-1991 Bulent Gokay, 2006-11-22 This is an impressive work that traces the relationship between the Soviet Union and Turkey on the one hand and the Soviet Union and the Turkish Communist Party on the other from the consolidation of the communist regime in Moscow until its fall. The book considers how Soviet Eastern Policy was formed, how it changed over time, what the Soviet leaders hoped to gain in Turkey, and what impact Soviet policy had on the development of the Turkish communist movement. Manuals Combined: U.S. Marine Corps Basic Reconnaissance Course (BRC) References, Over 5300 total pages. MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six-man team capable of conducting specific missions behind enemy lines. Common missions include but are not limited to: Plan, coordinate, and conduct amphibious ground reconnaissance and surveillance to observe, identify, and report enemy activity and collect other information of military significance; Conduct specialized surveying to include underwater reconnaissance and or demolitions, beach permeability, and topography; routes, bridges, structures, urban, rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment, or personnel assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include surface, subsurface, and airborne operations. Hubbard, 2015-11-06 Special Forces forward operational bases FOB are essential for mission and contingency planning as well as for the preparation infiltration and exfiltration of Operational Detachment Alphas ODA Therefore the defense of this command and control headquarters is critical for preserving combat power and synchronizing military actions in a theater of operations Because the enemy has the capability

of projecting forces with the objective of disrupting US military operations FOBs have become likely targets According to SF doctrine FOBs should be located in secure areas with MP or host nation personnel providing the bulk of the security force Although this situation is preferable it is by no means assured FOBs should be able to provide their own security in the event other forces are not available or when rapid deployment restricts the flow of conventional forces into a theater of operations After action review results from the Joint Readiness Training Center demonstrate that many SF battalions are not prepared to execute base defense tasks without the assistance of other forces Many SF commanders do not consider base defense a mission essential task and the result is a lack of training by many of their personnel This study analyzes joint and SF doctrine observations from the field and the effects of the contemporary operating environment to identify weaknesses in the readiness of SF battalions *Hearings, Reports and Prints of the Senate Committee on Government Operations* United States. Congress. Senate. Committee on Government Operations,1969 **A Bibliography of Military Geography** Eugene J. Palka,1988 This four volume document is designed to enhance scholarly research in the area of military geography and to serve as a reference tool It is anticipated that this will meet the research needs of professors and students of military science geography and history along with members of the Armed Forces government officials and planners This bibliography is organized following the accepted scheme for military geography utilizing three main categories systematic topical and regional Volume I is a complete alphabetized list Volume II is organized systematically Volume III is organized topically and Volume IV collects regional sources **From Siege to Surgical:** Major William T. James Jr.,2015-11-06 This study investigates what effect the evolution of urban combat from World War II to the present has had on current urban combat doctrine Urban combat operations have played a pivotal role in the conflicts of the twentieth century and will continue to be a crucial part of future U S power projection operations It is imperative that lessons learned from previous urban combat operations be studied for applicability to current urban combat doctrine The study analyzes the urban battles of Aachen Manila Seoul Hue JUST CAUSE and Mogadishu to identify salient lessons for conducting successful offensive urban combat operations then reviews current U S Army urban combat doctrine The study then evaluates current doctrine using identified salient lessons to determine their effect The study finds that the primary impacts of previous urban combat operations on current doctrine are that doctrine now embraces the idea of varied conditions for urban combat and validates the concept of fighting as a combined arms team in a built up area The study further finds that FM 90 10 Military Operations on Urban Terrain is obsolete and that key procurement decisions have left U S forces without critical weapons that have proven decisive in urban combat
