**A - Z Of Inclusion In Early Childhood** Dickins, Mary, 2014-02-01 The key themes in inclusion are explored through an A Z approach covering key concepts theories theorists and figures

Inclusion in the Early Years Cathy Nutbrown, Peter Clough, 2006-05-09 This is a book for those who want to find more to broaden their own perceptions and understanding of inclusion and to base their own practice on research and as such would interest and inform any practitioner from managers to students Early Years Update This text is a must buy for anyone interested in inclusive education in the early years A particular strength of the book is the way in which the everyday experiences of children parents and practitioners are discussed in relation to educational theory Perhaps the greatest strength of the book though lies in the way that ideas are based on research findings are presented so clearly It will almost certainly be nominated for this year's NASEN TES academic book award and deservedly so SENCO Update Refreshingly in this book inclusion is not about a narrow group of students defined as special but about increasing the participation of everybody involved in early years settings It is about reducing the exclusion of all children their families and communities It is also about the practitioners who work with them whose involvement in decisions in their own workplace is critical if they are to support the participation of children It is rich with experience from the UK and internationally building up an understanding of education from stories of encounters with children and their families This book will help readers to escape from the confines of considering children and the difficulties they encounter through the constricting and distorting lens of special educational needs Tony Booth Professor of Inclusive and International Education Canterbury Christ Church University Fascinating reading bound to inform discussions and encourage early years practitioners to develop and reflect on their own practices I will be recommending this book to colleagues and adding it to my essential reading list for students Nursery World A very helpful book which both challenges and informs It brings together important evidence to help us find a positive way forward Early Education Well written and accessible The book is rich with the reported experiences and ideas of educators and provides clear pointers for further research and discussion It will serve as an excellent stimulus for educators in any early years setting who are seeking to develop their own agreed philosophy and inclusive practices Support For Learning By identifying and discussing key

research studies on inclusion in the early years and drawing on studies of practitioners views and experiences of working inclusively this insightful text shows how practices in a range of early years settings can be influenced by the attitudes and responses of adults in those settings The authors argue for a broad definition of inclusion not limited to those with learning difficulties or impairment but addressing factors affecting all members of the learning community Key factors which can make inclusion successful are highlighted including curriculum and pedagogy professional development and work with parents The book shows how working inclusively involves all members of the setting community and presents a number of original stories generated from a recent research project carried out by the authors of how the lives of practitioners parents and children have been affected by inclusive and non inclusive practices This is an essential text for all early years students practitioners and researchers who want to become familiar with current research into inclusion and to develop ways of drawing on such studies to inform and develop their own inclusive practices

**Strategies to Promote Inclusive Practice**  
Richard Rose, Christina Tilstone, 2003-08-29 This book considers current issues in the development of policies to promote inclusive education for pupils with special educational needs By examining issues from the perspective of individual pupils schools and local education authorities it raises critical commentary on the ways forward for a co ordinated approach to inclusion Strategies to Promote Inclusive Practice draws upon the experience and expertise of teachers policy makers and researchers who explore the many factors which need to be addressed in the development of a more inclusive education system The authors explore the link between theoretical perspectives and the production of policy as well as the potential for translating this into good classroom practice They provide examples of approaches which have proved successful in enabling pupils to become better equipped to address the needs of a wide range of pupils In considering the impact of recent policy legislation and research the authors suggest that several models of inclusion may be necessary in order to become an inclusive education system This book will be of interest to students teachers policy makers and researchers who are concerned to advance the debate on inclusion towards a more pragmatic approach to providing for all pupils with special needs It is a companion text to Promoting Inclusive Practice edited by Christine Tilstone Lani Florian and Richard Rose RoutledgeFalmer 1998 which was the joint winner of the 1999 TES NASEN Academic Book Award
