Specializing Education Behaviorally:

Specializing Education Behaviorally Robert Douglas Greer, Laura Gilbert Dorow, 1976 *Designing Teaching Strategies*
R. Douglas Greer, 2002-07-17 can provide an educational system that treats the students and the parents as the clients

The Developmental Psychology of Music David J. Hargreaves, 1986-12-18 This book sets out the psychological basis of musical development in children and adults. The study has two major objectives: to review the research findings, theories, and methodologies relevant to the developmental study of music, and to offer a framework within which these can be organized so as to pave the way for future research. It describes the relationship between thinking and music and discusses the relationship between thinking and music in pre-schoolers and schoolchildren in areas such as singing, aesthetic appreciation, rhythmic and melodic development, and the acquisition of harmony and tonality. The book describes the development of musical taste and discusses the questions of musical creativity and of the social psychology of musical taste and fashion. As a comprehensive study of the links between developmental psychology and music education, Hargreaves' work demonstrates the practical and theoretical importance of psychological research on the process underlying children's musical perception, cognition, and performance.

Progress in Behavioral Studies A. J. Brownstein, R. Epstein, P. Harzem, 2019-01-22 Advancing the study of behavior and its humane applications in society, this book explores behavioral studies and the analysis of behavior. *Progress in Behavioral Studies* outlines the contributions of behavioral science to education, behavioral medicine, and other related disciplines. Individual papers report on progress made through the cautious introduction of quantitative formulations into analysis, the increased interchange of analysis with other disciplines such as economics and ethology, and the continuation of behavioral science as a basis for understanding more complex phenomena.

Learning Disabilities
Barry E. McNamara, 1998-08-13 This book addresses issues in teacher preparation and parental roles in the education of children with learning disabilities. It provides a variety of instructional approaches that recognize the cultural and linguistic diversity found in students classified as learning disabled. There is a critical need to incorporate a sensitivity to issues of diversity into educational assessment, curriculum planning, teacher training, and interactions with parents, especially in large urban areas which are characterized by cultural and linguistic diversity. Significant changes in traditional special education assessment and instruction are needed to effectively deal with the overrepresentation of minority students classified as learning disabled and to resolve the inherent problems with the definition and diagnosis of learning disabilities.

The Resource Room Barry Edwards McNamara, 1989-07-01 There are few comprehensive textbooks available to special educators responsible for developing, implementing, and monitoring resource room programs. McNamara's book fills this void by providing teachers and administrators with helpful practical information and by exploring the role of the resource room teacher as it relates to three major functions: assessment, instruction, and consultation. The information provided should also assist administrators and supervisors to evaluate their own existing resource room programs.
