## **Spectra For The Identification Of Additives In Food Packaging:**

*Spectra for the Identification of Additives in Food Packaging* Ben van Lierop, Laurence Castle, Alexandre Feigenbaum, Achim Boenke, 2012-12-06 This new book on additives used in plastics for food contact can be seen as a companion to the 1993 publication *Spectra for the Identification of Monomers in Food Packaging* 1 2 That earlier book presented information on monomeric substances listed in Directive 90/128 EEC 3 which restricts the range of monomers and other starting substances that can be used for the production of plastics materials and articles intended for food contact applications As a logical supplement to the collection of monomers and other starting substances the preparation of a reference collection and a Handbook of analytical data of additives was undertaken with funding from The European Commission under the Standards Measurements and Testing programme We then give a collection of spectra for the identification of 100 of the most important additives used in plastics packaging and coatings Infra red FT IR and mass spectra MS are presented as in the monomers book but we have extended the scope to include proton nuclear magnetic resonance <sup>1</sup>H NMR spectra and gas chromatographic GC data Legal Framework The Commission of the European Communities provides in Synoptic Document N 7 4 a provisional list of additives used for the production of food contact plastics This Synoptic Document anticipates a Directive on additives for food contact plastics One hundred of the most important additives were selected from this provisional list after extensive consultation with researchers in the field and with representatives from European industry Food Contact Additives Panel FCA sector group of the European Chemical Industry Council CEFIC
