retired principal and community superintendent Montgomery County Public Schools What impresses me most about Creating Thinking Classrooms is the notion of framing the retooling of schools as renovation or reinvigoration rather than as revolution Too many seem to ignore that there are many good things worth preserving in our schools and others that need to be reframed or recast to give them greater currency This book builds on what has worked and makes it better The message being purposeful and patiently focused on long term success is a powerful one that needs to be heard above the din David Chojnacki Executive Director Near East South Asia Council of Overseas Schools Encyclopaedia of Mathematics Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques **Journal of Research of the National Bureau of Standards** United States. Hyman, 2013-10-08 First published in 2001 This is Volume 2 in a series on the science of mental health and focuses on Autism It begins with an overview presentation of a case and a recent consensus description of diagnostic instruments for autistic spectrum disorders This is followed by recent epidemiologic data Epidemiology has an enhanced prominence in studies of autism because there is an unresolved controversy about the incidence of new cases of autism In some surveys the incidence of autism appears to be increasing and the controversy is over whether this is a true observation or whether greater diagnostic awareness is leading

to the apparent increase This volume attempt to resolve the conflicting data as if autism is indeed on the rise there must be a new significant environmental risk factor which has to be identified with a view to prevention **Annual Report of the National Bureau of Standards** United States.
