Speculations Vol 1 The Reality Club:

Speculations John Brockman, 1990 A collection of speculative essays on the human mind covers such issues as intelligence consciousness creativity and the beginning and ending of life *In Our Own Image* Maureen Caudill, 1992 In a sweeping look at state of the art breakthroughs in artificial intelligence robotics computer science psychology and neural networks neural networks expert Maureen Caudill reveals how close we are to achieving artificial vision language recognition problem solving memory and other requisites of intelligent robots She asserts that as our ability to make faster smaller cheaper computers blends with our ability to mimic the behavior of the human mind the first truly intelligent machines come closer to existence Yet she warns that there will likely be some unexpected and perhaps unpleasant consequences as androids will compete with humans for jobs and issues of ownership of an artificial being will come into play This fascinating book also prepares us for the day when we must learn to share the world with another intelligent species of our own creation *Paperbound Books in Print* , 1992 *Foundations in Social Neuroscience* John T. Blahnik, MD, the Desert Doc,2024-07-24 This is the first of a three volume memoir in the author s provocative tell all journey to feature the artistic side of the human condition As such there are matters that go well beyond Dr Blahnik s professional career as a physician and scientist Yet they are the unbreakable rules of the Scientific Method that guide our deep understanding of the Darwinian evolution of the human mind the DNA driven emergence of the psychotic mental illnesses and what we call human creativity In this first volume the lively narrative quickly connects us to the author s True Love for the American desert lands indeed the desert is his mistress in particular Death Valley National Park Then the whimsical adventure travels to Europe to Paris and Berlin but also elsewhere along the way always with a keen interest and focus on thought provoking matters of history All three books have the words in their titles thy Death Valley House for Beatty

The Natural and the Artefactual Keekok Lee, 1999-01-01 In this book philosopher Keekok Lee challenges one of the central assumptions of contemporary environmentalism that if we could reduce or eliminate pollution we could save the planet without unduly disrupting our modern industrialized societies Lee argues instead that the process of modernization with its attendant emphasis on technological innovation has fundamentally transformed nature into just another manmade artefact Ultimately what needs to be determined is if nature has value above and beyond human considerations whether aesthetic spiritual or biological This provocative book attempts to reconfigure environmental ethics positing the existence of two separate ontological categories the natural and the artefactual Natural entities be they organisms or inert matter are morally considerable because they possess the ontological value of independence whereas artefacts are created by humans expressly to serve their own interests and ends
