The Farm as Natural Habitat is a vital new contribution to the debate about agriculture and its impacts on the land Arising from the conviction that the agricultural landscape as a whole could be restored to a healthy diversity the book challenges the notion that the dominant agricultural landscape bereft of its original vegetation and wildlife and despoiled by chemical runoff is inevitable if we are to feed ourselves Contributors bring together insights and practices from the fields of conservation biology sustainable agriculture and environmental restoration to link agriculture and biodiversity farming and nature in celebrating a unique alternative to conventional agriculture Rejecting the idea that ecological sacrifice zones are a necessary
