Prototype Nation Silvia M. Lindtner,2020-09-15 A vivid look at China s shifting place in the global political economy of technology production How did China s mass manufacturing and copycat production become transformed in the global tech imagination from something

holding the nation back to one of its key assets Prototype Nation offers a rich transnational analysis of how the promise of democratized innovation and entrepreneurial life has shaped China's governance and global image With historical precision and ethnographic detail Silvia Lindtner reveals how a growing distrust in Western models of progress and development including Silicon Valley and the tech industry after the financial crisis of 2007-8 shaped the rise of the global maker movement and the vision of China as a new frontier of innovation Lindtner's investigations draw on more than a decade of research in experimental work spaces makerspaces coworking spaces innovation hubs hackathons and startup weekends in China the United States Africa Europe Taiwan and Singapore as well as in key sites of technology investment and industrial production tech incubators corporate offices and factories She examines how the ideals of the maker movement to intervene in social and economic structures served the technopolitical project of prototyping a new optimistic assertive and global China In doing so Lindtner demonstrates that entrepreneurial living influences governance education policy investment and urban redesign in ways that normalize the persistence of sexism racism colonialism and labor exploitation Prototype Nation shows that by attending to the bodies and sites that nurture entrepreneurial life technology can be extricated from the seemingly endless cycle of promise and violence Cover image Courtesy of Cao Fei Vitamin Creative Space and Spr th Magers
