The First 100 Feet Options For Internet And Broadband Access:

The First 100 Feet Deborah Hurley, James H. Keller, 1999-07-06 The growth of the Internet has been propelled in significant part by user investment in infrastructure computers internal wiring and the connection to the Internet provider This bottom up investment minimizes the investment burden facing providers New technologies such as wireless and data transmission over power lines as well as deregulation of telecommunications and electric utilities will provide new opportunities for user investment in intelligent infrastructure as leverage points for Internet and broadband access Recasting the problem of the last 100 feet as the opportunity of the first 100 feet this book challenges individuals businesses and policymakers to rethink fundamental issues in telecommunications policy The contributors look at options for Internet and broadband access from the perspective of homeowners apartment complexes and small businesses They evaluate the opportunities and obstacles for bottom up infrastructure development and the implications for traditional and alternative providers at the neighborhood regional and national levels Already some argue that Internet service will become the common denominator platform on which all other services can be carried A Publication of the Harvard Information Infrastructure Project

Infrastructure Planning and Finance Vicki Elmer, Adam Leigland, 2013-11-07 Infrastructure Planning and Finance is a non technical guide to the engineering planning and financing of major infrastructure projects in the United States providing both step by step guidance and a broad overview of the technical political and economic challenges of creating lasting infrastructure in the 21st Century Infrastructure Planning and Finance is designed for the local practitioner or student who wants to learn the basics of how to develop an infrastructure plan a program or an individual infrastructure project A team of authors with experience in public works planning and city government explain the history and economic environment of infrastructure and capital planning addressing common tools like the comprehensive plan sustainability plans and local regulations The book guides readers through the preparation and development of comprehensive plans and infrastructure projects and through major funding mechanisms from bonds user fees and impact fees to privatization and competition The rest of the book describes the individual infrastructure systems their elements current issues and a how to do it section that covers the system and the comprehensive plan development regulations and how it can be financed Innovations such as decentralization green and blue green technologies are described as well as local policy actions to achieve a more sustainable city are also addressed Chapters include water wastewater solid waste streets transportation airports ports community facilities parks schools energy and telecommunications Attention is given to how local policies can ensure a sustainable and climate friendly infrastructure system and how planning for them can be integrated across disciplines

Industrial Policy in Europe Keith Cowling, 2003-09-02 After a decade or more of privatisation and deregulation there is a growing consensus that government can have a positive role in promoting industrial development This book explores a variety of ways in which this might be made to happen A common theme is the need for participation at the

appropriate level too often industrial policy has been hampered by overcentralised decision making Containing contributions by some of Europe s leading industrial economists *Industrial Policy for Europe* covers subjects from small business to macroeconomics *Global Media Policy in the New Millennium* Marc Raboy,2002 This book traces the emergence of Britain s fifth and last terrestrial channel together with the changing broadcast environment in which it has evolved Drawing on interviews with key TV personnel it presents an historical analysis of Channel 5 from conception through to the end of the fifth year of transmission *Technology and Consumption* Ruby Roy Dholakia,2012-05-16 Technology and Household Consumption is a comprehensive text that provides insights into technology s impact on consumer behavior and the household environment Consumption and consumer behavior has become a very important subject of study that is now covered in many disciplines including family economics culture studies and feminist women studies In the first section this book provides a historical perspective on how consumer behaviors have changed because of technology and how technology itself has changed Data on ownership and expenditures is detailed in describing the penetration of technology in the household and changes over time In the examination of demographics and social changes an emphasis is placed on women and children As it is important to understand the entry paths and factors that influence them the book also introduces a research framework to understanding the adoption and utilization of household technologies In the second section the book examines specific household technologies and consumption experiences including shopping choices and behaviors entertainment outlets and availability communications technologies and working at home The book concludes with a section on the relationships between marketers and consumers *Promoting Local Growth* Daniel Felsenstein,Michael Taylor,2019-05-24 This title was first published in 2001 Focusing on new industries policies and new forms of governance the internationally renowned contributors to this volume examine the factors promoting the sub national economic growth that is paradoxically occurring in an era of globalization *Entrepreneurship, Social Capital and Governance* Charlie Karlsson,Börje Johansson,Roger Stough,2012-01-01 This book highlights the role of entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great

interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read

Creative Urban Regions: Harnessing Urban Technologies to Support Knowledge City Initiatives Yigitcanlar, Tan, Velibeyoglu, Koray, Baum, Scott, 2008-02-28 Explores the utilization of urban technology to support knowledge city initiatives providing fundamental techniques and processes for the successful integration of information technologies and urban production Presents research on a multitude of cutting edge urban information communication technology issues

Regional Policies and Comparative Advantage B"rje Johansson, Charlie Karlsson, Roger Stough, 2002-01-01 This title analyzes the conception of economic development in modern regions which has gone through a fundamental change since the early 1980s Regions are today increasingly looked upon as independant market places that are connected via interregional and international trade and not as administrative units embodied in a national state Two complementary theoretical frameworks explain the specialization of economic activity at the regional level The traditional approach assumes that the comparative advantages of regions depend upon differences in the supply of lasting resources In contrast the newer complementary framework called the new economic geography assumes that the dynamic interaction between geographical market potentials and rational firms in its own way creates the comparative advantage of regions The book examines the policy implications of the complementarity of the competing views in a variety of geographic and functional contexts
