The Family Allowance Under Attack:

Le salaire au travail ménager: Chronique d'une lutte féministe internationale (1972-1977) Louise Toupin, 2018-10-24 In this first ever international history of the influential feminist movement Wages for Housework Louise Toupin draws on extensive archival research and interviews with the movement's founders and activists from Italy England Germany Switzerland the United States and Canada Featuring previously unpublished conversations with Silvia Federici and Mariarosa Dalla Costa the book highlights the power and originality of the movement detailing its theoretical and organizational innovations around the unrecognized labour performed by women Challenging both classic Marxist theory and the mainstream women's movement Wages for Housework organized in the 1970s around the idea that domestic or reproductive labour is as crucial for the survival of the capitalist system as more typically male productive labour Its activists demanded the wage as a way of ensuring that housework's value be recognized an idea still hotly debated today Wages for Housework is a major contribution to the history of feminist and anti capitalist movements and a provocative intervention into contemporary conversations about the changing nature of work and the gendered labour market **Sex, Race, and Class—The Perspective of Winning** Selma James, 2012-05-01 In 1972 Selma James set out a new political perspective Her starting point was the millions of unwaged women who working in the home and on the land were not seen as workers and their struggles viewed as outside of the class struggle Based on her political training in the Johnson Forest Tendency founded by her late husband C L R James on movement experience South and North and on a respectful study of Marx she redefined the working class to include sectors previously dismissed as marginal For James the class struggle presents itself as the conflict between the reproduction and survival of the human race and the domination of the market with its exploitation wars and ecological devastation She sums up her strategy for change as Invest in Caring not Killing This selection spanning six decades traces the development of this perspective in the course of building an international campaigning network It includes excerpts from the classic *The Power of Women and the Subversion of the Community* which launched the domestic labor debate the exciting *Hookers in the House of the Lord* which describes a church occupation by sex workers an incisive review of the C L R James masterpiece *The Black Jacobins* a reappraisal of the novels of Jean Rhys and of the leadership of Julius Nyerere the groundbreaking *Marx and Feminism* and more The writing is lucid and without jargon The ideas never abstract spring from the experience of organising from trying to make sense of the successes and the setbacks and from the need to find a way forward **From Rights to Needs** Raymond B. Blake, 2009-07-01 This book explores the family allowance phenomenon from the idea's debut in the House of Commons in 1929 to the program's demise as a universal program under the Mulroney government in 1992 Although successive federal governments remained committed to its underlying principle of universality party politics bureaucracy federal provincial wrangling and the shifting priorities of citizens eroded the rights based approach to social security and replaced it with one based on need In tracing the evolution

of one social security program within a national perspective From Rights to Needs sheds new light on how Canada's welfare state and social policy has been transformed over the past half century Nationalism and Social Policy Daniel Béland, André Lecours, 2010-08-12 Despite the recent proliferation of literature on nationalism and on social policy relatively little has been written to analyse the possible interaction between the two Scholars interested in social citizenship have indirectly dealt with the interaction between national identity and social programs such as the British NHS but they have seldom examined this connection in reference to nationalism Specialists of nationalism rarely mention social policy focusing instead on language culture ethnicity and religion The main objective of this book is to explore the nature of the connection between nationalism and social policy from a comparative and historical perspective At the theoretical level this analysis will shed new light on a more general issue the relationships between identity formation territorial politics and social policy Although this book refers to the experience of many different countries the main cases are three multinational states that is states featuring strong nationalist movements Canada Quebec the United Kingdom Scotland and Belgium Flanders The book looks at the interplay between nationalism and social policy at both the state and sub state levels through a detailed comparison between these three cases In its concluding chapter the book brings in cases of mono national states i e France Germany Sweden and the United States to provide broader comparative insight on the meshing of nationalism and social policy The original theoretical framework for this research is built using insight from selected scholarship on nationalism and on the welfare state

The Codes of California as Amended and in Force at the Close of the Thirty-sixth Session of the Legislature, 1905 ...: Code of civil procedure California, 1907 Money in Their Own Name Wendy McKeen, 2004-01-01 In her analysis McKeen underscores this persistent familism that has been written and rewritten into Canadian social policy thereby denying women's autonomy as independent claims makers on the state *The Codes of California as Amended and in Force at the Close of the Thirty-sixth Session of the Legislature, 1905: Code of civil procedure. pt. 1, sections 1-1059; pt. 2, sections 1063-2104* California, 1908 The Failed Welfare Revolution Brian Steensland, 2017-10-31 Today the United States has one of the highest poverty rates among the world's rich industrial democracies The Failed Welfare Revolution shows us that things might have turned out differently During the 1960s and 1970s policymakers in three presidential administrations tried to replace the nation's existing welfare system with a revolutionary program to guarantee Americans basic economic security Surprisingly from today's vantage point guaranteed income plans received broad bipartisan support in the 1960s One proposal President Nixon's Family Assistance Plan nearly passed into law in the 1970s and President Carter advanced a similar bill a few years later The failure of these proposals marked the federal government's last direct effort to alleviate poverty among the least advantaged and ironically sowed the seeds of conservative welfare reform strategies under President Reagan and beyond This episode has largely vanished from America's collective memory Here Brian Steensland tells the whole story for the first time from why such an unlikely policy

idea first developed to the factors that sealed its fate His account based on extensive original research in presidential archives draws on mainstream social science perspectives that emphasize the influence of powerful stakeholder groups and policymaking institutions But Steensland also shows that some of the most potent obstacles to guaranteed income plans were cultural Most centrally by challenging Americans longstanding distinction between the deserving and undeserving poor the plans threatened the nation s cultural political and economic status quo

Ideologies of Welfare John Clarke,Allan Cochrane,Carol Smart,2025-10-01 The British welfare state has been a political and ideological battleground since its inception yet many of the voices in the crucial debates have been lost in orthodox histories First published in 1987 *Ideologies of Welfare* now with a new preface by the authors explores the development of the welfare state through the debates which surrounded it in three key periods the turn of the century the Beveridge period and the 1970s and 1980s Each section focusses on four main and competing approaches laissez faire individualism Fabianism socialism and feminism The tension between them is developed in a selection of substantial readings which are contextualized and contrasted by detailed commentaries from the authors For the first time we can trace the development of four key strands of welfare ideology in their own words Buried debates are re opened and hidden traditions identified continuity and change are highlighted The concluding chapter looks at the future of social security and examines the relationship between ideology and policy The combination of documentary material and commentary provides an invaluable history of welfare in the twentieth century for students of social policy and administration

Women and the Subversion of the Community Mariarosa Dalla Costa,2019-04-01 This collection brings together key texts and previously unavailable essays of the influential Italian feminist author and activist Mariarosa Dalla Costa In recent years there has been both a renewed interest in theories of social reproduction and an explosion of women s struggles and strikes across the world The collection offers both historical and contemporary Marxist feminist analysis of how the reproduction of labour and life functions under capitalism Dalla Costa s essays speeches and political interventions provide insight into the vibrant and combative women s movement that emerged in Italy and across the world in the early 1970s Since the publication of *Women and the Subversion of the Community* 1972 Dalla Costa has been a central figure in the development of autonomist thought in a wide range of anticapitalist and feminist social movements Her detailed research and provocative thinking deepens our understanding of the role of women s struggles for autonomy and control over their bodies and labour These essays provide critical and relevant ideas for anticapitalists antiracists and feminists who are attempting to build counterpower in the age of austerity
