Rediscovering Value Geary A. Rummler, Alan J. Ramias, Cherie L. Wilkins, 2011-01-13 To paraphrase a number of philosophers the major challenge any executive or manager and especially any CEO faces is that his or her experience of the reality of the organization is not the same as the reality itself How then does an executive

- 1 develop a more accurate and complete representation of the organization
- 2 identify critical business issues and improvement opportunities across this system
- 3 design a way forward and
- 4 install the feedback and measurement mechanisms necessary to ensure the organizational system delivers the performance and stays on course

The Political Economy of Bureaucracy Steven Richardson,2012-09-10 The Political Economy of Bureaucracy applies Public Choice theory and a complex systems view of government institutions to analyze policy implementation as an economic process It addresses the common and vexing question of why managing federal agencies for results is so difficult by challenging traditional assumptions of institutional design and policy analysis Using creative methods that focus on relationships that constrain the choices of executives and managers in a political hierarchy the author reveals control and coordination as goals that are imperfectly achieved and often conflicting with one another Despite decades of intense study serious reform efforts and impressive technological advances the U S government remains a typical bureaucracy that fails to meet citizens expectations Clearly policy analysis is missing something The problem may rest with machine models of government Rules especially those governing expenditures are assumed to be feasible and effective Analysis of the federal government as a complex system of relationships between semi autonomous agents helps explain the disconnect between policy and results The solution is to roll back micro management of ends and means policymakers should focus on objectives and facilitate implementation by selectively relaxing constraints that prevent experimentation needed to determine the most effective methods This book devotes unusual attention to the interaction between executive and legislative branches of government and between political appointees and career civil servants Most studies of government policy take existing institutional structure for granted Different conclusions emerge from this analysis by virtue of the systems view that accepts status quo hierarchies but questions the effectiveness of the rules that govern policy implementation This book will be of interest to postgraduates and researchers focussing on Economic Theory Public Choice Institutional Economics and Political Science as well as to those working in the public sector interested in Public Administration Public Policy and Organizational Behavior
