The First Kamchatka Expedition Of Vitus Bering 1725-1730:

The First Kamchatka Expedition of Vitus Bering, 1725-1730 James Leslie Smith, 2002 History of Vitus Bering's search for America 1725-1730 **Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America** Robin Inglis, 2008-04-02 The Northwest Coast of America ranging from northern California through Oregon Washington and British Columbia all the way up to Alaska was the last temperate coastline to be placed on the world map First visited by Russians in 1741 and thought to contain a navigable passage between the Pacific and the Atlantic it was systematically revealed during an intense period of exploratory and commercial activity from the 1770s to the 1790s Subsequently the imperial ambitions of Russia Spain and Britain and an assumption of manifest destiny by the United States led to further exploration and ensured that the region would become disputed territory before national boundaries were determined in the mid 19th century The Historical Dictionary of the Discovery and Exploration of the Northwest Coast of America tells of the heroic endeavors and remarkable achievements the endless speculation about a northwest passage and the fighting and manipulation for commercial advantage that surrounded this terrain This is done through an introductory essay a detailed chronology an extensive bibliography modern maps and selected historical maps and drawings and over 400 cross referenced dictionary entries Entries cover the native people encountered the scientists and artists who left an invaluable documentary and visual record of people places flora and fauna the numerous voyages taken by men such as Vitus Bering James Cook Juan Francisco de la Bodega y Quadra and George Vancouver overland expeditions like those of Alexander Mackenzie Simon Fraser Meriwether Lewis and William Clark and David Thompson and maritime fur traders including George Dixon Grigori Shelikhov Robert Gray and William Sturgis No other dictionary exists that is dedicated solely to the coverage of this region From Northeast Passage to Northern Sea Route, 2022-09-12 The notion of a waterway north of Eurasia conceived in the first half of the sixteenth century remained only a dream for centuries due to ice unmapped coastlines and a lack of geographical knowledge This volume is the first comprehensive scholarly account in English of the slow but steady exploration and commercial exploitation of the Siberian coastal waters and it proves that this was a truly international endeavour However in the end the Northern Sea Route as a through traverse route came to be used primarily by the Soviet Union for which it became a crucial vehicle for the geopolitical and economic integration of its vast territories As an international trade route the Northern Sea Route is only today about to win its way essentially as a result of global warming This being the case should we rejoice or despair *Physical Oceanography of the Frontal Zones in Sub-Arctic Seas* A.G. Kostianoy, J.C.J. Nihoul, V.B. Rodionov, 2004-12-16 This title presents the systematization and description of accumulated knowledge on oceanic fronts of the Norwegian Greenland Barents and Bering Seas The main fronts of the Norwegian Greenland and Barents Seas are part of the climatic North Polar Frontal Zone NPFZ The work is based on numerous observational data collected by the authors during special sea experiments directed at the investigation of physical processes

and phenomena inside certain parts of the NPFZ and in the northern part of the Bering Sea on archive data of the USSR Hydrometeocenter and other research institutions as well as on a wide scientific literature published in Russian and Western editions The book contains general information on the oceanic fronts of the Subarctic Seas brief history of their investigation state of the knowledge as well as detailed description of the thermohaline structure of all frontal zones in the Norwegian Greenland Barents and Bering Seas and of neighboring fronts of Arctic and coastal origin Special attention is given to the study of the multifrontal character of the NPFZ and of peculiarities of its internal structure at different locations to the description of diverse oceanic features observed in the NPFZ as well as to some characteristics of the horizontal and vertical fine structure of hydrophysical fields in the NPFZ The main features of the northern Bering Sea s summer ecohydrodynamics are investigated with the help of three dimensional direct and inverse models
