percentage of people who aspire to speak fluent English Where is the problem The problem is in realizing the truth about learning languages English is the second language for most people except native English speakers in countries like England the United States of America Australia and Canada The difficulty of learning a second language is that it is learned by keeping the native language at the foundation This means that English will be learned with reference from their native language like translations similarities in syntax grammar rules words and sentence formations It is also dependent on the education system which focuses on training grammar rules translations and written English It is assumed that spoken English will come naturally to the students sadly that never happens It is easy to find students in English medium schools and colleges struggling to present a topic in English Most will avoid interactions in English using the native language as the fundamental language of communication Another fact is known to all one of the top skills required to get any decent job is fluency in spoken English The solution is the realization that spoken and written English have equal importance but must be taught differently The methodology specified in the book is based on the philosophy that the language should be taught and learned like the native speaker just the way we learned our native language The idea will be explained and discussed in detail in the coming chapters

Freedom from Stammering Anshuman Sharma, 2022-07-04 Can stammering be defeated to become a good speaker The answer is yes Stammering will be defeated and you will reach the pinnacle of success if you believe in yourself and are ready to put in the required efforts How will this happen Stammering is due to anxiety triggered by the psychological fear of letters and words It means that your subconscious mind has accepted the fact that you will not be able to speak a specific letter or word It becomes a belief making it real You stammer If you get rid of this faulty thinking from your subconscious mind then your anxiety would diminish automatically to make you a better speaker without speech impediments Note the following points Stammering is a habit It is triggered automatically The problem of stammering can be solved by getting freedom from faulty habits We will share the ideas exercises and techniques of the people who have successfully defeated their stammering in the past and become good speakers with professional success and satisfaction It is said that stammering is a rigid habit that does not easily leave a person Stories abound about the years of struggle with stammering without results Even if the intensity of stammering is reduced slightly it tends to bounce back even harder After several failed efforts people accept their fate of living a life with a speech handicap We do not guarantee that everyone following this book will be able to cure their stammering completely The main objective is to present a large number of exercises techniques and ideas which have worked for other people and were responsible for developing their communication skills and personality and helping them to defeat their stammering to a certain extent In some cases stammering was cured to 99% while in other cases it was 70% 75% 85% 92% and so on This journey is going to be long and hard The stammering is not going to be cured immediately or show any signs of abating for several months But if the efforts are consistent and hard the stammering would slowly weaken and start to loosen its grip on the person This is the fundamental objective of this book

We hope that many people around the world would benefit from this collection of ideas and techniques If you want to fight your stammering with full force this book will stand with you in your struggle If you have high expectations from yourself and believe that you will be able to defeat your psychological fear of stammering then let us start the journey to better speaking without speech handicap
