both love cinema and wonder about that love Each chapter can stand alone even though all work together to challenge perspectives on what we encounter experience think and feel when we watch films Across its chapters Edge of the Screen takes on a wide range of topics the ontology of film the relation between characters actors and the figures who appear onscreen film s relationships to the other arts especially painting but also novels and theatre the passage of time in film and its momentary character film criticism including deeply held values such as coherence film s relationship to mortality and more
