US Combat Engineer 1941-45 Gordon L. Rottman,2012-06-20 At its peak in World War II the United States Army contained over 700 engineer battalions along with numerous independent brigades and regiments The specialized soldiers of the Engineers were tasked with a wide variety of crucially important tasks including river bridging camouflage airfield construction and water and petroleum supply However despite their important support roles the engineers were often employed on the front lines fighting beside the general infantry in the desperate battles of the European theatre This book

covers the role of these soldiers from their recruitment and training through their various support missions and combat experiences forming an account of what it was truly like to be a combat engineer in World War II Innovation In The Face Of Adversity: Major-General Sir Percy Hobart And The 79th Armoured Division (British) Major Michael J. Daniels, 2015-11-06 On 11 March 1943 the Chief of the British Imperial General Staff Field Marshal Sir Alan Brooke made a momentous decision in committing an entire British armored division the 79th to the task of developing equipment tactics and capabilities to penetrate the Atlantic Wall in anticipation of an Allied amphibious invasion of northwest Europe British leaders chose Major General Sir Percy Hobart to command this division largely because of Hobart's affinity for leading and training armored formations but also due to Hobart's reputation as an individualist known to seek out unique solutions to unforeseen challenges This thesis examines the wartime history of this unit concentrating on aspects of equipment tactics organization and leadership that enabled it to ultimately succeed beyond anyone's expectations More important this organization provides valuable lessons for current transformation efforts The key lessons that this subject provide include the need for leadership that combines vision with action a close cooperation between the military industrial complex and the end user and allowing space in the force structure for a unit that can perform not only standard combat missions but can also serve as experimentation test bed and conduit for new ideas whether in the form of capabilities organizational structure or doctrine

Rangers Lead the Way Steven J. Zaloga,2011-12-20 In the early hours of D Day 1944 a group from the US Army 2nd Rangers Battalion were sent on one of the legendary raids of World War II The mission was to scale the cliffs overlooking Omaha beach and assault the German coastal artillery at Pointe du Hoc It was thought that only a raid could ensure that the guns would remain silent during the D Day landings But allied intelligence was wrong After climbing the cliffs under aggressive German fire and securing the battery site the Rangers discovered that the guns themselves were no longer there It was only due to the heroic actions of the Rangers involved that the guns were located in firing positions facing Utah beach and destroyed before they could be used In the first of a brand new series for Osprey this act of audacious daring is brought to life complete with illustrated artwork maps and rare German accounts Taking a more critical look at the story Steven Zaloga analyses every detail from the intelligence failings to the boldness of the Rangers in the face of such odds *Gators*
